1	VIRGINIA DEPARTMENT OF HEALTH ADVISORY BOARD
2	OFFICE OF EMERGENCY MEDICAL SERVICES
3	TRAUMA ADMINISTRATION AND GOVERNANCE
4	FRIDAY, MAY 06, 2022
5	8:00 A.M.
6	CHAIR FERRADA: Okay, everybody.
7	Good morning. Thank you, Dave, for the
8	microphones. Can you hear me in the back? Good.
9	My name is Paula Ferrada. I'm the Division Chief
10	for Trauma and Acute Care Surgery for the Inova
11	Healthcare System and I have the pleasure and the
12	honor to be the tagged Chair as well. We are
13	going to start with the introductions before we
14	start with the minutes and agenda.
15	MS. CARTER: Mindy Carter, Office
16	of the EMS.
17	MR. KUREK: I am Stan Kurek, I am
18	the Trauma Director at Chippenham Hospital and
19	the newly appointed Systems Improvement Committee
20	Chair.
21	MR. WATKINS: Mike Watkins, I'm the
22	Deputy Chief of Goochland County Fire-Rescue and
23	the Chair of the Pre-Hospital Care Committee.
24	MR. HAYNES: I'm Jeff Haynes,
25	Pediatric Trauma Medical Director at VCU Health
l	

1 Children's Hospital of Richmond. 2 MS. BROERING: Beth Broering, the 3 Trauma Program and Burn Program Manager of the 4 VCU Medical Center in Richmond and the Chair of 5 the Post-Acute Committee. 6 MS. JEFFERS: Tracey Jeffers, I'm 7 the Trauma Chair for the Program Managers and I'm 8 also the Trauma Program Director at Reston. 9 MR. MARRY: Matthew Marry, Director 10 of Emergency Preparedness, Virginia Hospital & 11 Healthcare Association. 12 CHAIR FERRADA: May we start with 13 the back? 14 MR. KENNEDY: Tim Kennedy. Trauma 15 Program Director at Henrico Doctor's Forest. 16 MR. TEWEY: Robert Tewey, Director 17 of Engineering in ESO. 18 MS. JEWETT: Diana Jewett, Trauma 19 Program Director at Chippenham. 20 MR. TAYLOR: Dallas Taylor, Vice 21 President, Trauma Services at HCA Healthcare 2.2 Division. 23 MS. PIERCE: Whitney Pierce, Trauma 24 Program Manager at Children's Hospital of The 25 King's Daughters.

1 MS. TREVILIAN: Tanya Trevilian, 2 Trauma Program Manager at Carilion Children's, 3 Roanoke. 4 MR. DAY: Mark Day, Trauma Program 5 Manager at Sentara Virginia Beach General. 6 MR. GAMMON: Davis Gammon, Policy 7 and Legislative Director at VHHA. 8 MR. NEIMAN: Greg Neiman, EMS 9 Liaison for VCU Health. 10 MR. ORZEL: Josh Orzel, Trauma 11 Program Director at LewisGale Medical Center. 12 MS. WILSON: Jennifer Wilson, 13 Project Manager at ESO. 14 MR. MONTERA: Chris Montera from 15 the ESO. 16 MS. FERGUSON: Pier Ferguson, 17 ODEMSA. MS. STURT: Lori Sturt, Medical 18 19 Center Trauma Program Manager Intern. 20 MR. HARRELL: Adam Harrell, Office 21 of the EMS 22 MR. BROWN: Gary Brown, Office of 23 the EMS MR. PERRY: Wayne Perry, 24 25 Rappahannock EMS Council.

Trauma Admin and Governance May 6, 2022 Page 7 CCR#17248-1 MS. TURNER: I'm Amanda Turner, 1 Senior Director for Central Health. 2 3 MR. BOGE: David Boge, Trauma Co-4 Director of Lynchburg General. 5 MR. WEBER: William Weber, Trauma Medical Director of Lynchburg General. 6 7 MS. RIDEOUT: Kelsey Rideout, Rappahannock EMS Council. 8 MR. FEIRING: Charles Feiring from 9 10 Central Shenandoah EMS Council. 11 CHAIR FERRADA: Thank you everybody 12 for volunteering your time and for being here 13 today, and doing this important work for the State. Do we have enough people to approve the 14 15 minutes? 16 MS. BROERING: No. 17 CHAIR FERRADA: We don't have a 18 quorum to approve the minutes. I hope that next 19 time we meet, we will. But we should be able to 20 approve the agenda. 21 MS. BROERING: Yes. 22 CHAIR FERRADA: Do you have a minute to look at the agenda and see if you want 23 24 to add or remove anything? And that entertain a 25 motion to approve?

1	MR. MARRY: Second.
2	CHAIR FERRADA: Okay. So moved.
3	Let's move to the Chair's Report in terms of the
4	Trauma Administrative and Governance Committee.
5	We met in February and we did not have a quorum
6	to approve minutes or to approve much, but we
7	discussed the procedures moving forward in naming
8	people volunteers for empty seats in the Chairs
9	of Committees and with doing the Committees, I
10	had the opportunity to do that during this
11	meeting. So, I hope that in the near future we'll
12	have a quorum to continue to do this important
13	work. System Improvement Committee Report?
14	MR. KUREK: Thank you, Paula. We
15	had a nice introductory meeting, we did not have
16	quorum either so we cannot re-approve prior
17	minutes or the agenda. But we have a lot of good
18	discussions about repopulating the Committee
19	which is the next big step. So, all the
20	representatives from the various committees and
21	the 15-person structure will hopefully be filled
22	by the next time we meet. We also have goals and
23	objectives that were determined back in the last
24	time that the committee met was in February of
25	2020. They kind of wanted to write the goals and

1	objectives and everybody agreed that it's a good
2	place to continue with.
3	We had a couple of reports from
4	the various committees. We had a great discussion
5	about ESL and data integration and how we can
6	move forward with the state. So, I was excited to
7	learn about that. And we also want to read the
8	Quarterly Report and I think it's a great
9	document and I am excited that the document still
10	exists and is still been pretty populated.
11	Hopefully, once our committee gets up and
12	running, we'll be able to review the data and
13	give it back up to everybody. So I think I
14	conclude my report. Thank you.
15	CHAIR FERRADA: Thank you, Dr.
16	Kurek. Injury and Violence Prevention Committee?
17	MS. CARTER: Cory is not here.
18	CHAIR FERRADA: So, we're not gonna
19	have a report for that. Pre-hospital Care
20	Committee?
21	MR. WATKINS: Good morning. Mike
22	Watkins from Pre-hospital Care. My committee met
23	in the previous quarter and we did not meet this
24	time after discussing for the last time. We
25	really evaluated what we're doing, trying to

ſ	Trauma Admin and Governance May 6, 2022 CCR#17248-1 Page 10
1	understand and we want to come back to this
2	committee to make sure we have a clear set of
3	guidance moving forward.
4	The Pre-hospital Care Committee
5	meets, and all of them meet regionally on a
6	routine basis. So, coming together to State level
7	was a little, I'm not going to say
8	counterproductive, but EMS and pre-hospital staff
9	is the very regional focus. If I could review our
10	goals, because we're trying to have all of our
11	goals met, essentially. And that's kind of the
12	way, we kind of discussed it in the meeting is
13	that we look at what was set in front of the Pre-
14	hospital Care Committee that all those things
15	have been met. So we either need a new set of
16	goals or some identification.
17	Goal 1 was to develop and
18	implement the minimum set of statewide trauma
19	treatment protocols. This was actually owned by
20	the state medical direction committee, they had
21	this in process for protocols but EJNCR sets
22	their own. So the regions and each agency is
23	going to determine if there's trauma treatment
24	protocols and I believe Dr., she said that the
25	National Trauma Triage guidelines are getting

1	ready to change as well. So until that comes out,
2	we really would have to audible to that.
3	Goal 2, establish minimum
4	statewide destination guidelines for state triage
5	to accept the trauma triage. I kind of already
6	mentioned that for both the adult and pediatric
7	population, once that is published again, we can
8	incorporate and reevaluate that. But most of the
9	time, those regional assets are kind of making
10	that determination. And the reality is from a
11	government-based EMS agency, if you are a small
12	rural, government-based, or third-service for
13	volunteer agency, you're going to go to your
14	closest hospital, no matter what. Whether it's a
15	pedia patient or adult patient, your area is of
16	the state that actually legislates their, from
17	leaving the area. So, that requires a transfer of
18	agreement of some kind. So, that was Goal 2.
19	Goal 3, help resources of ground
20	critical care transport; Virginia Office of EMS
21	outlines in the critical care scope of practice
22	provides a look for agencies who may choose to
23	provide that. That was approved at the GAB lab
24	during the past week and that's already been set
25	forward as to what we can do. Again, it is

1	probably worth looking at some of those to
2	determine which ones are trauma-focused, I know
3	that broad product administration is one of the
4	red dot scopes of practice things and that's a
5	specific item based on a specific agency. There
6	are probably some varying units do that, that's
7	really a purview there, for example.
8	Support programs or recruitment

and retention of EMS providers, this is a part of 9 the Virginia Office of EMS workforce, it's not 10 11 really in the committee's scope. It is a 12 significant problem of creating and retaining 13 those career and volunteer personnel throughout 14 the state. It echoes and mirrors the nursing 15 shortage. And it's a problem that doesn't have a 16 very clear solution, but they're all working on 17 that, in that committee. And it probably needs to 18 stay in the workforce development committee and 19 not be a part of the Trauma Services because it 20 is a global issue and not necessarily a trauma 21 issue. 22 Straight to the language in the

23 Virginia code to update safe transportation

- 24 toward the back aim.
- 25

This has already been moved

1	forward in the regulations. Again, it came out of
2	medical direction and EMS for children, not these
3	committees. EMSC really pushed for all agencies
4	to have mechanisms to safely transport children
5	at the back of the ambulance. I would say the
6	biggest issue we have with the trauma side of
7	that is if most kids aren't going to get the
8	proper-fitting seat collar, no matter what you
9	do. The collars that the EMS uses for it is
10	pretty inadequate but that's something that is
11	being moved forward in the code.
12	Those are the five goals that were
13	listed in the COVAX plan. Most of those have been
14	either met, achieved or belonged in another
15	committee. We do have some vacancies, but there
16	are several, couple of folks that asked to step
17	out of the committee, so we are working to fill
18	that. We have two Vice-Chair, that's kind of,
19	everyone. And we're still trying to find a trauma
20	survivor or a private citizen representative and
21	I think that's a problem with all the committees.
22	CHAIR FERRADA: Correct.
23	MR. WATKINS: So, we did not meet
24	this go around because we have a pretty
25	productive meeting last time and we want to add

1	some goals forward to bring the group back
2	together. That concludes my report.
3	CHAIR FERRADA: Thank you so much
4	for the report. Maybe we can talk more of
5	aligning how we can move things forward.
6	MS. BROERING: This is Beth
7	Broering. Can I ask a question related to that?
8	Two things, actually. The first one is, I know
9	that many of treatment protocols are regionally
10	based or regionally approved but, and maybe these
11	hazards are already happening. Is there any
12	review or alignment of protocols across regions?
13	So, if there is a region that has, let's say,
14	protocol X for the treatment of, I don't know,
15	chest trauma, I'm making this up. Is that a line
16	across different regions or there are vast
17	variations and would that be an objective that
18	this committee, that your committee could take on
19	with some key protocols?
20	MR. WATKINS: I think if we had
21	data on it, we could probably address it. But I
22	think, most of the regions adopt protocols that
23	are more or less in line. I don't see any great
24	variation from region to region. I will tell you,
25	for example, TGEM has an open fracture protocol

Trauma Admin and Governance May 6, 2022 CCR#17248-1 Page 15
for antibiotics, and some of those are out there.
Is that something that we want to implement? I
still think that that's still really regional
dependent and it really matters on your receiving
facility. TXA is another example, some places
like TXA and someplace don't like TXA. I don't
think that we can really do that on a state
level, but from a BOS standpoint, I think it's
pretty standardized. And again, a lot of it goes
back to the triage and destination guidelines.
Traumas, airway breathing
circulation, bleed control, pain control, and
getting to the hospital. There's not a lot of, I
don't, and I would defer at anybody in the
audience who knows any great difference but I
don't think there are tremendous regional
differences other than some of those nuances that
I've mentioned. And I don't think we could re-
implement that at the state level. That differs
on Medical Directors on things like TXA, things
like that.
MS. BROERING: The second question
I have is, and I just kind of missed what you
said, because I knew it has certainly been a
topic of concern and discussion multiple times

ſ	Trauma Admin and Governance May 6, 2022 CCR#17248-1 Page 16
1	that the ODEMSA is in the Central Virginia
2	Region. And that is the guidelines related to
3	what is critical care paramedics. I heard you
4	say, clarify for me, is that there have been
5	guidelines approved by GAB?
6	MR. WATKINS: It was approved,
7	there's a scope of practice and scope of
8	formulary document that's all now on the EMS
9	webpage. It outlines skills procedures that are
10	above the standard that has been, I guess
11	national standard, well product administration,
12	I'd rather say, because it's innovation,
13	innovation pediatrics. Those we're all things
14	that are considered above skill and those are
15	endorsed by the medical directors at the agency
16	rather. And the State's going to require that the
17	Medical Directors would specifically endorse
18	letters. Which requires that they must have
19	documented training on that and some of that is
20	going to depend on the type of agency. An ambul
21	service that does critical care, will do one
22	thing a 911 agency will do something probably
23	different.
24	MR. KUREK: Can I ask a follow-up
25	question on that, Paula?

1	CHAIR FERRADA: Sure.
2	MR. KUREK: One of the things that
3	we we're looking at pre-COVID is not only pre-
4	hospital triage, but maybe then transfer specific
5	injuries in children to a higher level of care
6	across the state. So that transcends the regional
7	thing, the regional EMS councils. So to address
8	that, should that be then addressed if we pick it
9	up in the future, in a Pre-hospital Care
10	Committee, or is that more of a System
11	Improvement Committee? Skate as a whole,
12	commonwealth as a whole, trying to address that
13	and maybe that goes with the best question too if
14	it's something like TXA. Is that the bailiwick of
15	EMS, the pre-hospital committee, and the System
16	Improvement Committee, one or the other, should
17	we talk, help me with your organization, I don't
18	think I get that.
19	CHAIR FERRADA: Yes, I see Adam
20	raising his hand.
21	MR. HARRELL: My recommendation for
22	that, to the committee, would be to start with
23	system improvement as part of the report that was
24	mentioned earlier to review the data aspect. So
25	with the epidemiology clerks and the data folks

1	that sit on that committee to make
2	recommendations like yours for review research
3	and inclusion in some of the already existing
4	reporting mechanisms. And then, as that is
5	reviewed through the said committee, it could
6	filter down for operationalizing or further
7	review and discussion in subsequent committees.
8	So those are the two areas you brought up, there
9	are definitely things that could be reviewed with
10	EMS epidemiology staff, as part of the reports
11	that are produced for the said committee.
12	CHAIR FERRADA: I think that's a
13	great suggestion and I believe that you have a
14	seat open for somebody in pediatrics?
15	MR. HAYNES: We do and I think Goal
16	4 of that committee was to help with integration
17	of guidelines development. I think we got a good
18	TXA and children's
19	CHAIR FERRADA: So, Doctor Haynes
20	will be a great voluntary for
21	MR. HARRELL: Yes, we're going to
22	talk afterward. I didn't know that you are the
23	new chair and I'm happy to help with that on the
24	System Improvement Committee. Thank you.
25	CHAIR FERRADA: Great.

	· · · · · · · · · · · · · · · · · · ·
1	MR. WATKINS: Just to add to the
2	critical care aspect of it. A lot of that also
3	ties into medical side of things. It's not just
4	trauma. Plus, those things are more
5	comprehensive, so defining critical care
6	transport is not just trauma, and most, I'll be
7	honest, most trauma patients are not critical
8	care transports. They're getting there quickly
9	versus somebody who needs A-lines and ventilators
10	and things like that. But that's common, you're
11	head-injured trauma patient community hospitals
12	will need a vent and sedation, that's that
13	critical care piece of it that would be both
14	trauma and medical side if that makes sense.
15	CHAIR FERRADA: Yes. Thank you so
16	much for that.
17	MR. KUREK: Can I ask one more
18	question? I'm sorry, since we're in a quorum.
19	CHAIR FERRADA: Yes. No. No. No.
20	Please. Yes, it's fine.
21	MR. KUREK: Back to the data
22	question, I remember when we were meeting in
23	Norfolk around the time of the symposium, pre-
24	COVID, we were all presented, for the second
25	time, wonderful data are broken down into adult,

r	Trauma Admin and Governance May 6, 2022 CCR#17248-1 Page 20
1	pediatric, by region level, of injury, etc. and
2	I've not seen that since. I don't know where is
3	that and if that comes up in the agendas. I was
4	thinking about it if that can be recreated,
5	wonderful.
6	CHAIR FERRADA: That's part of the
7	Systems Committee that we reviewed yesterday. The
8	problem is that we have not been able to approve
9	any of that because we have not have quorums
10	since COVID. So, the fact that you're going to be
11	helping in the committee is wonderful because we
12	need to fill those seats and then hopefully, next
13	time around that we'll quorum, then we'll have
14	that report.
15	MR. KUREK: Yes. Great.
16	MR. WATKINS: We actually produced
17	all the reports during COVID it's just that we
18	have not published them because they have not
19	been reviewed during COVID. So, we want it
20	reviewed by the appropriate committees before we
21	release those. But for that, those reports do
22	exist and we do have that continued from the last
23	one that you saw.
24	CHAIR FERRADA: Right.
25	MR. KUREK: Wonderful. Thank you.
L	

1	CHAIR FERRADA: Which are extremely
2	helpful, I completely agree. Acute Care
3	Committee. Dr. Young is sick, but he sent me,
4	hopefully not with COVID, but he sent me, they've
5	met yesterday, and they have a very productive
6	meeting. Dr. Goode is not here either. He's the
7	Vice-Chair but he also agreed with the report.
8	They're working in revising and updating the
9	Designation Manual. The plan was to wait until
10	the new ACS Manual was published to complete
11	that.
12	There's a small workgroup that is
13	now taking the extensive TPM work to compare
14	their standards to the new ACS standards and
15	hoping to create some commonality. And they
16	discussed the options for centers designated by
17	the American College of Surgeons and the
18	Commonwealth. And several methods were discussed
19	with Mr. Gary Brown, so please make comments. And
20	basically, they were debriefed an effort to check
21	if there's a possibility in adapting the site
22	business process to minimize duplication. I
23	remember we discussed it last time, but I don't
24	know, Gary, if you want to add anything else to
25	that?

1	MR. BROWN: If there's anything,
2	I'd say it. Thank you.
3	CHAIR FERRADA: Okay. So they're
4	still working on that. They met, and it was
5	productive. They are one of the committees that I
6	think they have their chairs filled and they did
7	have quorum yesterday.
8	MS. CARTER: A couple of them.
9	CHAIR FERRADA: Yeah. Post-Acute
10	Committee.
11	MS. BROERING: Thank you, Dr.
12	Ferrada. This is Beth Broering as the Chair of
13	the Post Acute Committee. We did have a quorum
14	and we actually, fortunately, have a majority of
15	the seats and representation for the different
16	divisions or groups that had been identified
17	previously to have representation of those
18	groups. There was an identification that we'd
19	likely need a representation for ELF hacks. For
20	home health agencies we're actually have a call
21	this afternoon with the Executive Director of
22	Home Health Agencies Organization, I guess that's
23	the word, to hopefully identify a liaison from
24	that group.
25	We had a brief discussion about

ſ	Trauma Admin and Governance May 6, 2022 CCR#17248-1 Page 23
1	the number of beds in the Commonwealth. And that
2	report was produced prior to COVID, back in 2019.
3	And so, the need to sort of update that and take
4	a look at it and make sure that we review that.
5	And then, looking at sort of, hopefully, for the
6	next time, developing some short-term goals and
7	some longer-term items. And hopefully then,
8	requesting some potential data from the State to
9	look at some of our outcomes.
10	I did make a suggestion or offered
11	a suggestion to the committee that we consider
12	what data elements may be necessary for trauma
13	centers to collect this part of potential post-
14	acute or as a way to tend post-acute care for
15	patients. I do know some states, I'm just going
16	to use the examples, some states actually collect
17	discharge filmscores. I don't know if there's
18	value in that or not, but I think that's
19	something that we can consider as we move
20	forward. Thank you.
21	CHAIR FERRADA: Thank you for your
22	hard work. Emergency Preparedness and Response
23	Committee.
24	MS. CARTER: So, this committee did
25	not meet. This time, Dr. Feldman had a prior

Trauma Admin and Governance May 6, 2022 CCR#17248-1 Page 24 commitment for both days. So, he chose not to 1 have the committee meet this time. 2 3 CHAIR FERRADA: But we're going to 4 arrange for them to meet, maybe before we meet 5 again. 6 MS. CARTER: I will have to discuss 7 that with him, yes. 8 CHAIR FERRADA: Yes. I'm going to 9 strongly encourage him to meet before we meet 10 again. 11 MS. CARTER: Okay. 12 CHAIR FERRADA: Trauma Fund Update. 13 MR. HARRELL: So, the trauma fund, 14 as far as payments go this year, all payments 15 have been made. There were a couple of I call 16 them paperwork issues that were outside of OEMS 17 that I know mediation, fiscal worked with those 18 facilities. As of this point, what I've been told 19 is all payments have been delivered. As far as 20 updating, anything from legislation, I have to 21 defer to other folks. But as of right now, we 22 don't have a budget so I can't necessarily speak 23 to that with the budget still being in limbo. 24 CHAIR FERRADA: Okay. Thank you. 25 MR. GAMMON: I'm going to give an

1	update on the legislative side. So, colleagues of
2	mine have spoken with the Senate finance staff on
3	the Trauma Fund and the update from the Senate
4	finance staff is they've looked at the account
5	and it's showing that it is adequately funded for
6	this year. So, that is this point, based on your
7	update so I will encourage you to talk with them
8	and compare on that.

9 MR. HARRELL: We'd give them that 10 data every year and this is one of those areas 11 that we fight with them because this fund, just like all the EMS money is a non-reversing fund. 12 13 So, at the end of the fiscal year, the balance 14 that's in there rolls to the next. The money that 15 we payout is always a year behind, because of the manner it's collected. We do that so that there's 16 17 always a sufficient amount. We have to return 18 money if somebody, you know, if there's an issue 19 with like, if they challenge every state, for 20 example. So, my driver's license was suspended, I 21 paid to have it reinstated but I have appealed 22 the reason that it was suspended in the first 23 place. If they win that appeal, then we have to 24 give them their money back. Same thing with the 25 DUI money because they go with it. So that's

always one of the biggest reasons we pulled over 1 2 for a year... 3 MS. CARTER: It's always a year 4 behind. 5 MR. HARRELL: ... and we have to give it back if they win the appeal. I explained 6 7 this to Senate Finance every year, and explain to them that the money that's in there is not this 8 9 year. They always look at it from the standpoint 10 of every other governmental account that it's 11 going to be spent by the end of this year. And if 12 that's the case, that would be funded. What's 13 been collected this fiscal year, is actually next year's payment. And I provided them the trended 14 15 data, the same thing we produced for the trauma 16 fund reviews for commissioner's office to show 17 where there has been this downward trend as all 18 the hospitals had seen and what they receive. 19 So the part that, it's always 20 disturbing to me and we did a heated discussion 21 with their staff when they used the term 22 "adequately funded", I always ask them "What are 23 you comparing that to?" Because none of the data that we give them provides an adequate comparison 24 25 to what's going to be paid out to the trauma

r	Trauma Admin and Governance May 6, 2022 CCR#17248-1 Page 27
1	centers in the Commonwealth for the next year
2	around. So, I'm at a loss, those folks, they tend
3	to look at it like it's an area of the
4	governmental account, and what's in there is
5	going to be paid out by the end of the year. And
6	no matter how insurance and trauma policy, the
7	legislation, everything, that this is non-
8	reverting. And I can't seem to get through to it.
9	MR. GAMMON: That's incredibly
10	helpful. We had similar discussions with them on
11	other budget items, and it doesn't really seem to
12	get through. So, we'll take that information back
13	to them. The good news is that I think for year
14	two, there does seem to be, to continue to put
15	new money into the trauma fund. So we'll continue
16	to keep you updated on that. But then on the
17	broader budget update, we do seem to get much
18	closer, I think, hopefully, in the next coming
19	weeks, to actually having a budget done. Budget
20	is, that's the budget office. Thank you for that
21	information.
22	MS. BROERING: I have to clarify
23	the budget or question for both Adam and, I'm
24	sorry.
25	MR. GAMMON: Davis.

1	MS PROFRINC, David I halique mu
	MS. BROERING: Davis. I believe, my
2	understanding, our understanding that I heard
3	earlier was that we were attempting to have a
4	line item in the budget, that would be a fixed-
5	line item. And the original number was quite
6	large. And I think that it was decreased down and
7	I want to say I heard the 5 million number that
8	would be in there as a fixed-line item in the
9	budget. And then on top of that would be this
10	rolling pot as you described, Adam, that we are
11	constantly fighting for. So if there's anything
12	that you can provide to us as the trauma centers,
13	and I know that we are working closely. I know we
14	are working closely with Kara, our legislative
15	liaison. But if there are things that we can do,
16	either individually or again, messaging that
17	should be sent out, can you give us that
18	guidance? I know we fight it over here, but
19	MR. HARRELL: VHHA may be able to
20	speak more of this than I can. When it comes to
21	budgetary line items, we don't really get pinged
22	on those. We get pinged on if there's code
23	changes and so forth.
24	MS. BROERING: Right.
25	MR. HARRELL: We do monitor it and
l	

,	
1	we do forward it up to our chain of command when
2	we see things that are alarming to us. But from
3	our perspective, we don't actively get to engage
4	in that and sometimes the information we get is
5	after the fact. Like an advocate, I do speak to
6	Senate Finance, House Appropriations, every
7	general assembly cycle and provide them the same
8	reports that I provide to you all and to the
9	commissioner's office to say, this is
10	utilization, this is the downward trend and the
11	cost of the business in the Commonwealth is going
12	up. So we got to be able to compensate for that
13	in a fund that shows, historically, a steady
14	decline in funding. So outside of that, I don't
15	have as much insight, especially in the Senate
16	finance until I ask those questions.
17	MR. GAMMON: From an advocacy
18	standpoint, the one thing that I think maybe,
19	probably it just has to become a priority for the
20	General Assembly members. And I think to this
21	point, it just probably hasn't been. And it's
22	been this back and forth with Senate Finance
23	staff. And I think with the current staff,
24	frankly, it's a hard row to hoe. And it just kind
25	of have to be direct conversations with members
l	

rking with your local elected officials. think looking at this group, there's a representation of localities and I think conversations with elected officials and ng that broad base as support long term. we'll get that dedicated long-term nable funding.

we'll get that dedicated long-term			
nable funding.			
-			
MR. HARRELL: I like to account			
little bit what you said, in a			
eight. After this General Assembly, we had			
two budget amendments for the trauma center fund,			
and both passed unanimously on the Senate budget			
amendment on the Senate side and the budget			
amendment on the house side. But where it stalls			
is when it gets to the appropriations on the			
Finance Committee. So, they will both			
t			
MS. CARTER: It's amazing it passed			
ously on both sides.			
MR. HARRELL: That's where it hits			
adblock. It stalled, actually, among the			
to those committees. That's where the			
m lies.			
CHAIR FERRADA: If there's any			

ſ	Trauma Admin and Governance May 6, 2022 CCR#17248-1 Page 31
1	be, including myself, thrilled to have
2	conversations about anything that we can do to
3	help and move forward. Any other legislative
4	issues that we need to report? That's it? That
5	was it?
6	MS. CARTER: That's all they had.
7	CHAIR FERRADA: Okay, trauma fund
8	update. We already talked about that. Trauma
9	Program Management report.
10	MS. JEFFERS: Good morning. The
11	Trauma Program Managers met yesterday from 4:30
12	to 6:15ish. We were tasked, as a workgroup, we
13	are tasked with certain agendas and proposals to
14	send that to whatever committee asked us. So, the
15	Office of EMS in conjunction with ESO and in
16	regards to the Virginia State Registry, we were
17	asked to review and report proposals for
18	DataField, state-mandated versus NTDB, to
19	evaluate what data help support our trauma
20	patients in the Commonwealth. That was assigned
21	to a workgroup outside of our trauma program
22	manager workgroup. And that was represented by
23	each level designated and also we included a
24	registrar within that group since they are the
25	content experts on the registry. And they were

given a deadline for that for May 31st. That was the deadline that was set as a whole group and we broke it out to a subgroup that will have that done by May 31st. And they have support from ESO, Robert has preciously agreed to help with those data fields.

7 The other project that we were tasked with, approximately 2 years ago, was the 8 9 TPM workgroup was tasked with reviewing the 10 trauma designation manual. We have been through 11 the trauma designation manual, we have made 12 change proposals to the designation criteria to 13 include the manual and the capability forms. That was tasked by the Acute Care Committee. And we 14 15 have decided as a group that we are not ready to 16 send that up to them. We will have that ready to 17 be set up to the Acute Care Committee by the next 18 meeting. So, our workgroup was put together for 19 that. Each individual level was tasked with 20 reviewing their designation criteria, along with 21 any ACS-verified institutions, but also do a 22 crosswalk/gap analysis of the ACS grade book 23 since that is now out and ready to be reviewed 24 between each criterion. And then that proposal 25 will be brought up again to the Office of EMS and

1	the	Acute	Care	Committee.
---	-----	-------	------	------------

T

-				
2	So, we have set a deadline for			
3	that and we decided that that would be June, we			
4	are going to meet in June. And June 3rd, Friday,			
5	we were going to have a WebEx on that and discuss			
6	where we are and if we needed more time. And we			
7	would have that proposal ready to go up to the			
8	Acute Care Committee by next meeting. That pretty			
9	much took up most of our time. And our support			
10	systems for that, of course, our chairs for the			
11	Acute Care Committee, which will be Dr. Young and			
12	Dr. Boge, who's the Vice-Chair.			
13	CHAIR FERRADA: That's wonderful.			
13 14	CHAIR FERRADA: That's wonderful. Thank you so much for your hard work. Any

14 15 16 17 18 19 20 21	Thank you so much for your hard work. Any questions for the Trauma Program managers? Thank you. The Virginia American College of Surgeons COT report. Dr. Butano has met past weekend during the chapter. We discussed with Dr. Kurek and Dr. Leshley the lack of diversity and lack of participation. And I think one of the strategies moving forward that was discussed during that			

25 level one trauma center that we have in Virginia,

1 we have many. So, that's under consideration and 2 we are working also with the current president of 3 the American College of Surgeons, Virginia 4 Chapter. Dr. Megan Tracy is an expert in advocacy 5 and very involved in having equal representation 6 in how to make the COT Virginia a little bit more 7 involved. Yeah.

8 MR. KUREK: Yes, and with the representation from the various trauma centers, 9 10 we also discussed that they opened up their 11 trauma program directors and any trauma staff 12 could join the COT. So there's going to be a push 13 to send that information out to everybody as well as getting the list of all the trauma surgeons in 14 15 the state to try to get them involved. We 16 literally had 4 people in our meeting and in 17 Texas we had 150. In Florida, we had a couple of 18 hundred. So, we're really trying to make a big 19 push to get involvement. 20 CHAIR FERRADA: Yes, a 100%. 21 MR. KUREK: Yes, so they're going 22 to continue to focus on resident paper

23 competition as well. But getting that committee

- 24 populated is important.
- 25

CHAIR FERRADA: Yes. And if you

г	Trauma Admin and Governance May 6, 2022 CCR#17248-1 Page 35
1	know of anybody that wants to volunteer their
2	time and efforts, please contact us and contact
3	Dr. Aboutanos. We'll make the best joint effort
4	to get more representation. EMS report?
5	COMMITTEE MEMBER: They stepped
6	out.
7	MS. BROERING: Dr. Ferrada and Dr.
8	Kurek, can you at least get the dates of those,
9	all the meetings, and how to get involved to
10	Tracey for the trauma program managers? I think
11	some of that is as much of a lack of information
12	and awareness as it is. Some of it is probably a
13	time or knowing that they can't do.
14	CHAIR FERRADA: Yes.
15	MR. KUREK: Yes, sure. I'll readch
16	out to Dr. Aboutanos. Yep, we'll get that on the
17	agenda.
18	CHAIR FERRADA: There is no, so,
19	when there's a paper competition, it doesn't have
20	to be limited to residency. If there are nurses
21	or trauma managers or anything that you want to
22	put up for the COT, that's welcome and
23	encouraged. Yes.
24	MS. CARTER: EMS report?
25	CHAIR FERRADA: Yeah.
L	

1	MS. CARTER: So, some of my		
2	colleagues have stepped out of the room to go to		
3	another meeting. I can tell you as far as my own		
4	division, I do have a Trauma Critical Care		
5	Manager position currently posted. If you know		
6	people who may be interested, it is still open		
7	for another 2 weeks. It'll close in 2 weeks		
8	potentially. We also are hiring a contractor. I		
9	don't know how many of you are aware of this,		
10	it's a little bit confusing. Wanda was our		
11	primary clerical support for the division. And		
12	she also supported other divisions. And before		
13	she ended up taking an extended leave for		
14	multiple reasons, she was actually promoted to		
15	the Executive Secretary of the Office.		
16	So, she actually, and she has		
17	never been backfilled. So, we are currently		
18	looking at a contract position to backfill her		
19	duties and responsibilities, so we're working on		
20	that now. The other piece that was sort of		
21	groundbreaking yesterday was that the		
22	commissioner, as of July 1st, has ordered that		
23	all Virginia Department of Health employees will		
24	go back to the office 5 days a week, full time,		
25	starting July 1st. So, even though there have		

r	Trauma Admin and Governance May 6, 2022 CCR#17248-1 Page 37
1	been meetings that have continued on-site and in-
2	person, and that's become more frequent over the
3	last couple of months or so, we will all be in
4	the office 5 days a week starting July 1st. And
5	that's all I have.
6	CHAIR FERRADA: Thank you so much.
7	Any questions? Okay. This is the time for the
8	public comment period. There are no comments? I
9	appreciate everybody's time and if you have any
10	desire to participate with any of our committees,
11	or with the COT, or if there's anything that we
12	can do, we actually appreciate and greatly in
13	support for the time that you're willing to
14	invest in moving these projects forward. New
15	business?
16	MR. WATKINS: I guess so. Can we
17	get an update on how the reporting system is
18	working as far as getting information? Like Dr.,
19	I was looking at a quarterly report from back in
20	April 2019, or second quarter 2019, that's the
21	last time we saw any of that data related to
22	trauma. And I think that was just a very useful
23	because it was packaged in about 6 or 7 pages and
24	was able to be digested. I've sent a sample to
25	Mindy. I'm just trying to get an understanding of

r	Trauma Admin and Governance May 6, 2022 CCR#17248-1 Page 38
1	where that information is. I know that it's a
2	regional level, we've specifically looked at
3	trauma destination, we've looked at trauma on
4	rest. These are things we do feel could be
5	expanded to the state level but if we don't have
6	the data to look at, it's hard to really discuss.
7	MS. CARTER: So, as Adam alluded to
8	earlier, those reports apparently have been
9	continuing throughout the whole pandemic. So, the
10	reports are there, but I think it typically gets
11	approved through the Systems Committee first. And
12	we have not had a quorum and yesterday, we
13	basically did not have anybody to vote on that.
14	So, it would become available after they approve
15	for it for the general, whoever wants to consume
16	that report. So, the reports are there as that's
17	packaged previously. Now if you want something
18	different, that's a different story.
19	MR. WATKINS: I think those would
20	be great, but that it's kind of counterproductive
21	if we're waiting on a quorum for a committee to
22	release some of that information. Data is data.
23	CHAIR FERRADA: Right.
24	MR. WATKINS: It really doesn't
25	need approval. Unless you have something that

г	Trauma Admin and Governance May 6, 2022 CCR#17248-1 Page 39
1	you're really scared of, there's no need to
2	approve it at the committee level. Again, you're
3	still trying to restructure some of it. This
4	committee or even the, I think that's something
5	that, it's better to have a raw data to look at
6	it than to have just-, I mean, we haven't seen
7	anything since 2019. And our stuff, it's going to
8	be important to identify any discrepancies, and
9	CTSO folks stepped out, between those who have
10	image trends and and those who have ESO. Because
11	that is a continuing issue. My agency is not
12	going to be moving to ESO, so there's going to be
13	some discrepancies. And it's important, not just
14	as trammel, to identify where our data
15	discrepancies. And if we wait a year or 2 years,
16	we're not going to
17	CHAIR FERRADA: Yes, it's not going
18	to be relevant. So no, I think we both are in
19	agreement. We are both also new to these
20	committees and learning the processes. Let me
21	talk to Gary and find out how can we fix that
22	because I agree data is data. And at the end,
23	we're here to serve our patients.
24	MR. KUREK: We had a long
25	discussion about this yesterday. We're talking

r	Trauma Admin and Governance   May 6, 2022   CCR#17248-1   Page 40			
1	about repopulating this committee over the next			
2	month or two. Because we don't have a quorum, the			
3	chair is able to appoint those people. So, I			
4	think the part of that committee is data			
5	validation and making sure things that go out are			
6	agreed upon by everybody. So, I don't think it's			
7	going to hold it up anymore. I really think			
8	before our next meeting will be totally			
9	populated, the Office of EMS, the folks already			
10	have the data. They said they can give that to us			
11	any time. So, the next time we meet, in August,			
12	we should, is it August?			
13	MS. CARTER: Yes.			
14	MR. KUREK: I think we should			
15	hopefully have a brand new committee with that			
16	data to review at that next meeting to bring back			
17	to this meeting.			
18	CHAIR FERRADA: Yes.			
19	MR. KUREK: That's my goal.			
20	CHAIR FERRADA: No, a 100%, yes.			
21	MR. KUREK: It doesn't have to be			
22	reinventing the wheel.			
23	MR. WATKINS: Do we have a list of			
24	those subcommittees that must go under my			
25	committee to populate over to several other			

	,
1	committees?
2	MS. CARTER: So we do have
3	MR. WATKINS: I don't have the
4	final list of what that was.
5	MS. CARTER: So, we do have, and
6	that's a good point to bring up. I do have a
7	master list now. I can't really say that it has
8	been well-maintained and there's obviously been a
9	change in personnel. And so, because of the fact
10	that we had to move some of these committees from
11	the normal days that they occurred before, some
12	of these committees are going to be concurrent.
13	And it may be that some of that crossover
14	personnel from the one committee to the other may
15	have to change because you can't be in two or
16	three places at the same time. So, I think that's
17	something that the individual committees are
18	going to have to go forward.
19	MR. WATKINS: I think that was a
20	pretty significant issue because my committee is
21	basically divided in between. We were in three or
22	four different places at once. And that's
23	functional. And I don't know who our system
24	improvement is but I'll be glad to sit on the
25	system. Represent Pre-hospital System

1 Improvement. 2 CHAIR FERRADA: I agree. Yeah. 3 MR. KUREK: I was hoping it was 4 you. 5 MR. WATKINS: Yeah. 6 MS. CARTER: I think what I 7 wanted... 8 MR. WATKINS: No, I'm the chair so 9 Ι... 10 MR. KUREK: The chair? 11 CHAIR FERRADA: Yes. 12 MR. KUREL: That's I think that's 13 how it's done in the past, right? 14 CHAIR FERRADA: Yes. 15 MR. KUREK: So, you're either chair 16 or a representative. 17 MR. WATKINS: I'll take a seat. 18 I'll definitely make sure pre-hospital has a 19 System Improvement right there. 20 CHAIR FERRADA: Yes, we appreciate 21 your service. Thank you so much. Any other new 2.2 business? Yes? 23 MR. KENNEDY: Tim Kennedy. I'm 24 still trying to navigate the structure of all 25 these committees, but in the event, we don't have

Trauma Admin and Governance May 6, 2022 CCR#17248-1 Page 43 a quorum at our next meeting too, is it possible 1 for that approval to kind of go up the chain of 2 3 committees that might have a quorum at it? 4 CHAIR FERRADA: Can you repeat the 5 question? What is it that needs to be approved? 6 MS. CARTER: I'm not sure what he's 7 asking. 8 CHAIR FERRADA: Yes, rephrase it. 9 MR. KENNEDY: Is it possible if we 10 don't a quorum at the next Systems Improvement 11 Committee that if we had a quorum here, that it 12 could be approved here instead of through that 13 committee? 14 CHAIR FERRADA: What could be 15 approved? 16 MR. KENNEDY: The data. 17 CHAIR FERRADA: I don't know, but I 18 am 99.9% certain that we will have a quorum next 19 time. 20 MR. KUREK: I think the whole 21 purpose of this subcommittee is data validation. 22 Data and quality. And that's what the committee 23 was formed for. So, I think we'll have it solid 24 by that. 25 MS. BROERING: In response to those

I	Trauma Admin and Governance May 6, 2022 CCR#17248-1 Page 44
1	questions, and I know that some of the things
2	that we're looking at a systems level is
3	important and we have to go through the approval.
4	I think what I am hearing, Mindy, that will be
5	helpful is especially like, I'm going to use the
6	example. Depths of PI committee specifically,
7	we've waited and waited, especially since the
8	transition and we've heard, "We can't pull data
9	yet or we can't get it." So, I think what Mike is
10	also alluding to is even at the depths of the
11	regional committee, and PI committee, we'd like
12	to be able to look at some of the things that
13	we've done to. Pain management, again, trauma
14	arrest. It doesn't necessarily have to be at the
15	state level. Can we get that for ODEMSA? Or can
16	the ODEMSA or PI committee ask for data or get
17	data and use it within their PI?
18	MS. CARTER: Yes.
19	MS. BROERING: Okay. Because we
20	have heard previously that we can't. So
21	MS. CARTER: I believe that you
22	can.
23	MS. BROERING: Okay.
24	MS. CARTER: And I think it just is
25	a matter of requesting that data and the specific

elements that you want and going forward with 1 2 that. 3 MS. BROERING: Okay, so the tech, 4 all right, and when I say we can't it's that it's 5 not available because something about the 6 technology or being able to build the reports or 7 whatever. So, that's really helpful. 8 MS. CARTER: I think it's going to 9 depend on the timeframe potentially, that you're 10 looking at. 11 MS. BROERING: Yep. 12 MS CARTER: And the elements that 13 you want. 14 MS. BROERING: Okay, perfect. 15 MS. CARTER: And we can help. I 16 think it's helpful sometimes to have a discussion 17 with the data folks and the epidemiology folks to 18 sort of craft that to make that what you want. 19 MS. BROERING: That's super. 20 Thanks. 21 MR. WATKINS: I guess the last 22 thing, we contacted the other members of this 23 committee to make sure they're continuing and 24 identifying these, because I know there's a 25 couple of things on here that I haven't seen for

1	a while. I just want to make sure we keep that
2	marks, I think.
3	CHAIR FERRADA: Yes, I contacted
4	people to fill in all the empty chairs from the
5	subcommittees. There's one person that we're
6	still trying to find out somebody for a level 3.
7	So, if you have any suggestions, and our
8	citizen's seat is asked in many of the committees
9	absent and that's something that I want to
10	address with Gary, because even though we
11	appreciate that, that participation is also
12	keeping you from having a quorum when you don't
13	have participation. But yes, the answer is yes.
14	And hopefully, we'll have a quorum next time.
15	MR. WATKINS: I guess who's already
16	separate? It was Dr. Scott taking all
17	MS. CARTER: Joshua Easter. I think
18	that's another thing going forward. Some people
19	have moved out of state, some people are no
20	longer interested in participating. Some people
21	were members who actually never participated. So,
22	I think that as we kind of get these things back
23	together, it's the rebuilding year. I think that
24	our big focus, it's getting the right people and
25	getting them to the meetings. And so that's work

Г

Page 47

1	to be done.
2	CHAIR FERRADA: Right.
3	MS. TREVILIAN: One question. Tanya
4	Trevilian with Carilion Children's ESO. The
5	question I have is that serving on a committee
6	kind of also aligns with some other committees
7	that I've actively participated on because
8	there's limited participation in southwest
9	Virginia. So, as much as I, again, I love to
10	participate in additional ways with the trauma
11	system. But EMSC is very important to me because
12	again, there's no representative from my area on
13	that committee that aligns with the Acute Care
14	Committee which I know has advocacy for a
15	pediatric representative. Is there any
16	flexibility within the scheduling of the meetings
17	so that there's not an overlap? For particular
18	meetings, that these people would be kind of
19	MS. CARTER: It was tough to get
20	them all scheduled. When the GAB moved, it had
21	bedrock effects in terms of that 3 hours, it made
22	a huge difference. And because we wanted to have
23	all of the subcommittee meetings meet before the
24	GAB. Basically, squeezing them in there and
25	getting the rooms here on site was a chore and it

	Trauma Admin and Governance May 6, 2022 CCR#17248-1 Page 4
1	was a fight just to get the room. So, I think
2	it's scheduled the way it is. If committees want
3	to cooperatively get together the chairs and flip
4	flop their times or something like that, I'm all
5	for that. I'm going to be here all day. And some
6	of you will be here all day. But other than them
7	getting together and cooperatively changing their
8	times, there's not much flexibility there. And
9	you're welcome to do that. And I'm happy to help
10	facilitate that if you want.
11	CHAIR FERRADA: Thank you. Thank
12	you everybody for your time. We really appreciate
13	it. We know that it's time you take away from
14	your work and for your family and we're really
15	appreciative for the time you volunteer and the
16	hard work. And motion to adjourn?
17	MR. WATKINS: So move.
18	CHAIR FERRADA: So move.
19	(WHEREUPON, the Meeting was concluded at 8:50
20	a.m.)
