

## \*\*\* National POLST Form NOTICE \*\*\*

The National POLST form is now approved for use in Virginia. While the Virginia POST form may still be used, transitioning to the National POLST form is recommended.

The National POLST Form is a portable medical order set. Health care professionals should complete this form only after a conversation with their patient or the patient's representative. The POLST decision-making process is for patients who are at risk for a life-threatening clinical event because they have a serious life-limiting medical condition, which may include advanced frailty (www.polst.org/guidance-appropriate-patients-pdf).

This form should be obtained from and completed with a health care professional. **It should not be provided to patients or individuals to complete.** 

## Virginia and the National POLST Form

- POLST is not valid until signed by a physician, nurse practitioner or physician assistant who has a bona fide relationship with the patient. See Code of Virginia §54.1-2957.02 and §54.1-2952.2 respectively for further information.
- Use of the original form is encouraged. A photocopy, fax, or electronic version should be honored as if it were an original.
- Other DNR forms continue to be recognized under Administrative Code of Virginia §12VAC5-66-10.
   Such forms include, but are not limited to the Virginia DDNR form/POST/MOST/POLST/MOLST/Approved DNR jewelry
- If "No CPR: Do Not Attempt Resuscitation" is checked in Section A, and patient has signed the form, no one has the authority to revoke consent for the DDNR order other than the patient as stated in the Code of Virginia §54.1-2987.1.
- If "Yes CPR: Attempt Resuscitation" is checked in Section A, a legally authorized decision maker may make changes to carry out the patient's preferences in light of the patient's changing condition.

## **Printing the National POLST Form**

- Do not alter this form.
- Print BOTH pages as a double-sided form on a single sheet of paper.
- Printing on bright yellow paper is recommended by EMS and the Virginia POLST Collaborative but printing on white paper is acceptable.

Paper suggestion:  $8.5 \times 11$ , 23.36 M weight (cardstock), Lift-Off Lemon by Astrobrights

HIPAA PERMITS DISCLOSURE OF POLST ORDERS TO HEALTH CARE PROVIDERS AS NECESSARY FOR TREATMENT Medical Record # (Optional) SEND FORM WITH PATIENT WHENEVER TRANSFERRED OR DISCHARGED

## **National POLST Form: A Portable Medical Order**

Health care providers should complete this form only after a conversation with their patient or the patient's representative. The POLST decision-making process is for patients who are at risk for a life-threatening clinical event because they have a serious life-limiting medical condition, which may include advanced frailty (www.polst.org/guidance-appropriate-patients-pdf)

serious ine-infilling inedical condition, which may include advanced trainty (www.poist.org/guidance-appropriate-patients-put).										
Pat	ient Informatio	n.		Having a POLST form is always voluntary.						
This is a medical order,		Patient First Name:								
not an advance directive.		Middle Name/Initial: Preferred name:

Α. (	Cardiopulmonary	Resusc	itation	Orders. Follow these orders i	f patient has	no pulse and	is not breathing.			
· · · · · · · · · · · · · · · ·				tation, including mechanical vent rsion. (Requires choosing Full Tro			<b>Do Not Attempt Resuscitation.</b> Dose any option in Section B)			
B. I	nitial Treatment	Orders.	Follo	w these orders if patient has a	pulse and/or	r is breathing.				
Reassess and discuss interventions with patient or patient representative regularly to ensure treatments are meeting patient's care goals. Consider a time-trial of interventions based on goals and specific outcomes.										
	Full Treatments (required if choose CPR in Section A). Goal: Attempt to sustain life by all medically effective means. Provide appropriate medical and surgical treatments as indicated to attempt to prolong life, including intensive care.									
Pick 1	Selective Treatments. Goal: Attempt to restore function while avoiding intensive care and resuscitation efforts (ventilator, defibrillation and cardioversion). May use non-invasive positive airway pressure, antibiotics and IV fluids as indicated. Avoid intensive care. Transfer to hospital if treatment needs cannot be met in current location.  Comfort-focused Treatments. Goal: Maximize comfort through symptom management; allow natural death. Use oxygen, suction and manual treatment of airway obstruction as needed for comfort. Avoid treatments listed in full or select treatments unless consistent with comfort goal. Transfer to hospital only if comfort cannot be achieved in current setting.									
C. A	C. Additional Orders or Instructions. These orders are in addition to those above (e.g., blood products, dialysis).
