

# Bright Smiles For Babies

Information for Parents About Healthy Teeth for Babies

## As part of today's visit, we can:

- Do a simple dental screening
- Teach you how to care for baby teeth
- Brush fluoride varnish on your child's teeth
- Help you find a dentist for your child

Healthy baby teeth are important for:

- Chewing
- Talking
- Smiling
- Healthy permanent teeth
- Healthy children

## Fluoride Varnish Facts:

- Fluoride makes teeth stronger to help prevent cavities.
- It is painted on baby teeth with a soft brush. It only takes a few seconds.
- It has a pleasant taste.
- It is FREE, if your child has Medicaid.

Keep Your Baby Smiling and Prevent Tooth Decay
