	No	8.0	3.3	12.8

Virginia PRAMS is a population-based survey of Virginia resident women with a recent live birth. Approximately 2,000 women are invited to participate annually. Percent (%), 95% confidence interval (CI) and estimated number of women are statistically weighted to represent all Virginia women with a live birth in the given time period. Symbols indicate whether the health indicator had statistically significant differences between levels (p-value <0.05, chi-square test).

Virginia PRAMS is a collaboration between the Virginia Department of Health and the Centers for Disease Control and Prevention. For more information on Virginia PRAMS, visit our website at: <http://www.vdhivewell.com/prams> or call 877-897-7267.
