

# 12VAC5-481 VIRGINIA RADIATION PROTECTION REGULATIONS

## PART I GENERAL PROVISIONS

Section 10	Definitions
Section 20	Scope
Section 30	Deliberate misconduct
Section 40	Reserved
Section 50	Reserved
Section 60	Reserved
Section 70	Reserved
Section 80	Reserved
Section 90	Exemptions from regulatory requirements
Section 100	Records
Section 110	Inspections and enforcement
Section 120	[Reserved]
Section 130	Impounding
Section 140	Prohibited uses
Section 150	Communications
Section 160	Effective date
Section 170	Removal of notices posted by agency prohibited
Section 180	Tests
Section 190	Additional regulatory requirements
Section 200	[Repealed]
Section 210	Types of hearings
Section 220	Hearing as a matter of right
Section 230	Appeal
Section 240	Units of exposure and dose
Section 250	Units of radioactivity

## PART II REGISTRATION OF RADIATION MACHINE FACILITIES AND SERVICES

- Section 260 Purpose and scope
- Section 270 Exemptions
- Section 280 Shielding plan review
- Section 290 Registration of radiation machine facilities
- Section 300 Issuance of registration certificate
- Section 310 Renewal of registration and approval not implied
- Section 320 Expiration of registration certificate
- Section 330 Report of changes
- Section 340 Private inspector qualifications
- Section 350 Assembler or transfer obligation
- Section 360 Reciprocal recognition of out-of-state radiation machines
- Section 370 Certification of X-ray systems

## PART III LICENSING OF RADIOACTIVE MATERIAL

- Section 380 Purpose and scope
- Section 390 Source material
- Section 400 Radioactive material other than source material
- Section 410 Types of licenses
- Section 420 General licenses - source material
- Section 421 Requirements for license to initially transfer source material for use under small quantities of source material general license
- Section 430 General licenses - radioactive material other than source material
- Section 440 Filing application for specific licenses
- Section 450 General requirements for the issuance of specific licenses
- Section 451 Physical protection of Category 1 and Category 2 quantities of radioactive material
- Section 460 [Repealed]
- Section 470 Special requirements for specific licenses of broad scope

- Section 480 Special requirements for a specific license to manufacture, assemble, repair, or distribute commodities, products, or devices that contain radioactive material
- Section 490 Issuance of specific licenses
- Section 500 Specific terms and conditions of licenses
- Section 510 Expiration and termination of licenses and decommissioning of sites and separate building or outdoor areas
- Section 520 Renewal of licenses
- Section 530 Amendment of licenses at request of licensee
- Section 540 Agency action on applications to renew or amend
- Section 550 Persons possessing a license for source, byproduct, or special nuclear material in quantities not sufficient to form a critical mass on effective date of these regulations
- Section 560 Persons possessing NARM on effective date of these regulations
- Section 570 Transfer of material
- Section 571 Receipt, transfer and disposal records
- Section 580 Modification and revocation of licenses
- Section 590 Reciprocal recognition of licenses

#### PART IV STANDARDS FOR PROTECTION AGAINST RADIATION

- Section 600 Purpose
- Section 610 Scope
- Section 620 Implementation
- Section 630 Radiation protection programs
- Section 640 Occupational dose limits for adults
- Section 650 Compliance with requirements for summation of external and internal doses
- Section 660 Determination of external dose from airborne radioactive material
- Section 670 Determination of internal exposure
- Section 680 Determination of prior occupational dose
- Section 690 Planned special exposures
- Section 700 Occupational dose limits for minors
- Section 710 Dose to an embryo/fetus

Section 720	Dose limits for individual members of the public
Section 730	Compliance with dose limits for individual members of the public
Section 740	Testing for leakage or contamination of sealed sources
Section 750	General
Section 760	Conditions requiring individual monitoring of external and internal occupational dose
Section 770	Location of individual monitoring devices
Section 780	Control of access to high radiation areas
Section 790	Control of access to very high radiation areas
Section 800	[Repealed]
Section 810	Use of process or other engineering controls
Section 820	Use of other controls
Section 830	Use of individual respiratory protection equipment
Section 840	Security and control of licensed or registered sources of radiation
Section 850	Radiation symbol; caution signs
Section 860	Posting requirements
Section 870	Exceptions to posting requirements
Section 880	Labeling containers and radiation machines
Section 890	Exemptions to labeling requirements
Section 900	Procedures for receiving and opening packages
Section 910	General requirements
Section 920	Method for obtaining approval of proposed disposal procedures
Section 930	Disposal by release into sanitary sewerage
Section 940	Treatment or disposal by incineration
Section 950	Disposal of specific wastes
Section 960	Transfer for disposal and manifests
Section 970	Compliance with environmental and health protection regulations
Section 971	Disposal of certain byproduct material

Section 980	General provisions
Section 990	Records of radiation protection programs
Section 1000	Records of surveys
Section 1010	Records of tests for leakage or contamination of sealed sources
Section 1020	Records of prior occupational dose
Section 1030	Records of planned special exposures
Section 1040	Records of individual monitoring results
Section 1050	Records of dose to individual members of the public
Section 1060	Records of waste disposal
Section 1070	Records of testing entry control devices for very high radiation areas
Section 1080	Form of records
Section 1090	Reports of stolen, lost, or missing licensed or registered sources of radiation
Section 1100	Notification of incidents
Section 1110	Reporting requirements
Section 1120	Reports of planned special exposures
Section 1130	Reports of individual monitoring
Section 1140	Notifications and reports to individuals
Section 1150	Reports of leaking or contaminated sealed sources
Section 1151	Reports of transactions involving nationally tracked sources
Section 1160	[Repealed]
Section 1161	Radiological criteria for license termination

## **PART V RADIATION SAFETY REQUIREMENTS FOR INDUSTRIAL RADIOGRAPHIC OPERATIONS**

Section 1170	Purpose
Section 1180	Scope
Section 1190	Exemptions
Section 1200	Licensing and registration requirements for industrial radiography operations
Section 1210	Performance requirements for industrial radiography equipment

Section 1220	Limits on external radiation levels from storage containers and source changers
Section 1230	Locking of sources of radiation, storage containers and source changers
Section 1240	Radiation survey instruments
Section 1250	Leak testing and replacement of sealed sources
Section 1260	Quarterly inventory
Section 1270	Inspection and maintenance of radiation machines, radiographic exposure devices, transport and storage containers, associated equipment, source changers and survey instruments
Section 1280	Permanent radiographic installations
Section 1290	Labeling, storage, and transportation
Section 1300	Conducting industrial radiographic operations
Section 1310	Radiation safety officer
Section 1320	Training
Section 1330	Operating and emergency procedures
Section 1340	Supervision of radiographer's assistants
Section 1350	Personnel monitoring
Section 1360	Radiation surveys
Section 1370	Surveillance
Section 1380	Posting
Section 1390	Records for industrial radiography
Section 1400	Records of receipt and transfer of sources of radiation
Section 1410	Records of radiation survey instruments
Section 1420	Records of leak testing of sealed sources and devices containing DU
Section 1430	Records of quarterly inventory
Section 1440	Utilization logs
Section 1450	Records of inspection and maintenance of radiation machines, radiographic exposure devices, transport and storage containers, associated equipment, source changers and survey instruments

- Section 1460 Records of alarm system and entrance control checks at permanent radiographic installations
- Section 1470 Records of training and certification
- Section 1480 Copies of operating and emergency procedures
- Section 1490 Records of personnel monitoring
- Section 1500 Records of radiation surveys
- Section 1510 Form of records
- Section 1520 Location of documents and records
- Section 1530 Notifications
- Section 1540 [Repealed]
- Section 1550 [Repealed]
- Section 1560 Reciprocity
- Section 1570 Specific requirements for radiographic personnel performing industrial radiography

## PART VI USE OF DIAGNOSTIC X-RAYS IN THE HEALING ARTS

- Section 1580 [Repealed]
- Section 1581 Purpose and scope
- Section 1590 [Repealed]
- Section 1591 General and administrative requirements
- Section 1600 [Repealed]
- Section 1601 General requirements for all diagnostic X-ray systems
- Section 1610 [Repealed]
- Section 1611 Fluoroscopic X-ray systems
- Section 1620 [Repealed]
- Section 1621 Radiographic systems other than fluoroscopic, dental intraoral, or computed tomography X-ray systems
- Section 1630 [Repealed]
- Section 1631 Intraoral dental radiographic systems
- Section 1640 [Repealed]

Section 1641 Computed tomography X-ray systems

Section 1650 [Repealed]

Section 1651 Mammography requirements

Section 1653 Hand-held radiographic unit

Section 1655 Bone densitometry

Section 1657 Quality assurance program

## PART VII USE OF RADIONUCLIDES IN THE HEALING ARTS

Section 1660 Purpose and scope

Section 1670 General requirements

Section 1680 Licensing and exemptions

Section 1690 Notifications

Section 1700 Authority and responsibilities for the radiation protection programs and changes

Section 1710 Supervision

Section 1720 Written directives

Section 1730 Procedures for administrations requiring a written directive

Section 1740 Suppliers for sealed sources or devices for medical use

Section 1750 Training for Radiation Safety Officer

Section 1760 Training for an authorized medical physicist

Section 1770 Training for an authorized nuclear pharmacist

Section 1780 Training for experienced Radiation Safety Officer, teletherapy or medical physicist, authorized nuclear pharmacist, and authorized user

Section 1790 Recentness of training

Section 1800 Possession, use, and calibration of instruments used to measure the activity of unsealed byproduct material

Section 1810 [Repealed]

Section 1820 Determination of dosages of unsealed byproduct material for medical use

Section 1830 Authorization for calibration, transmission, and reference sources

Section 1840 Requirements for possession of sealed sources and brachytherapy sources

Section 1850	Labeling of vials and syringes
Section 1860	Surveys of ambient radiation exposure rate
Section 1870	Release of individuals containing unsealed byproduct material or implants
Section 1880	Provision of mobile medical service
Section 1890	Decay-in-storage
Section 1900	Use of unsealed byproduct material for uptake, dilution, and excretion studies for which a written directive is not required
Section 1910	Training for uptake, dilution, and excretion studies
Section 1920	Use of unsealed byproduct material for imaging and localization studies for which a written directive is not required
Section 1930	Permissible molybdenum-99 concentration
Section 1940	Training for imaging and localization studies
Section 1950	Use of unsealed by product material for which a written directive is required
Section 1960	Safety instruction
Section 1970	Safety precautions
Section 1980	Training for use of unsealed byproduct material for which a written directive is required
Section 1990	Training for the oral administration of sodium iodide I-131 requiring a written directive in quantities less than or equal to 33 mCi (1.22 GBq)
Section 2000	Training for the oral administration of sodium iodide I-131 requiring a written directive in quantities greater than 33 mCi (1.22 GBq)
Section 2001	Training for the parental administration of unsealed byproduct material requiring a written directive
Section 2010	Manual Brachytherapy
Section 2011	Surveys after source implant and removal
Section 2012	Brachytherapy sources accountability
Section 2013	Safety instructions
Section 2014	Safety precautions
Section 2015	Calibration measurements of brachytherapy sources
Section 2016	Decay of strontium-90 sources for ophthalmic treatments

- Section 2017 Therapy-related computer systems
- Section 2018 Training for use of manual brachytherapy sources
- Section 2019 Training for ophthalmic use of strontium-90
- Section 2020 Use of sealed sources for diagnosis
- Section 2030 Training for use of sealed sources for diagnosis
- Section 2040 Training requirements and use of a sealed source in a remote afterloader unit, teletherapy unit, or gamma stereotactic radiosurgery unit
- Section 2041 Surveys required
- Section 2042 Installation, maintenance, adjustment and repair
- Section 2043 Safety procedures and instructions, and precautions for remote afterloader units, teletherapy units, and gamma stereotactic radiosurgery units
- Section 2044 Dosimetry equipment
- Section 2045 Full calibration measurements
- Section 2046 Periodic spot-checks
- Section 2047 Additional technical requirements for mobile remote afterloader units
- Section 2048 Five-year inspection for teletherapy and gamma stereotactic radiosurgery units
- Section 2049 Therapy-related computer systems
- Section 2050 [Repealed]
- Section 2060 Other medical uses of byproduct material or radiation from byproduct materials
- Section 2070 Records
- Section 2080 Reports

## PART VIII RADIATION SAFETY REQUIREMENTS FOR ANALYTICAL X-RAY EQUIPMENT

- Section 2090 Purpose and scope
- Section 2100 Equipment requirements
- Section 2110 Area requirements
- Section 2120 Operating requirements
- Section 2130 Personnel requirements

## PART IX RADIATION SAFETY REQUIREMENTS FOR PARTICLE ACCELERATORS

- Section 2140 Purpose and scope
- Section 2150 Registration requirements
- Section 2160 General requirements for the issuance of a registration for particle accelerators
- Section 2170 Human use of particle accelerators
- Section 2180 Limitations
- Section 2190 Shielding and safety design requirements
- Section 2200 Particle accelerator controls and interlock systems
- Section 2210 Warning devices
- Section 2220 Operating procedures
- Section 2230 Radiation monitoring requirements
- Section 2240 Ventilation systems

## PART X NOTICES, INSTRUCTIONS AND REPORTS TO WORKERS; INSPECTIONS

- Section 2250 Purpose and scope
- Section 2260 Posting of notices to workers
- Section 2270 Instructions to workers
- Section 2280 Notifications and reports to individuals
- Section 2290 Presence of representatives of licensees or registrants and workers during inspection
- Section 2300 Consultation with workers during inspections
- Section 2310 Requests by workers for inspections
- Section 2320 Inspections not warranted; informal review

## PART XI LICENSING REQUIREMENTS FOR LAND DISPOSAL OF RADIOACTIVE WASTE

- Section 2330 Purpose and scope
- Section 2340 License required
- Section 2350 Content of application
- Section 2360 General information
- Section 2370 Specific technical information

Section 2380	Technical analyses
Section 2390	Institutional information
Section 2400	Financial information
Section 2410	Requirements for issuance of a license
Section 2420	Conditions of licenses
Section 2430	Application for renewal or closure
Section 2440	Contents of application for site closure and stabilization
Section 2450	Post-closure observation and maintenance
Section 2460	Transfer of license
Section 2470	Termination of license
Section 2480	General requirement
Section 2490	Protection of the general population from releases of radioactivity
Section 2500	Protection of individuals from inadvertent intrusion
Section 2510	Protection of individuals during operations
Section 2520	Stability of the disposal site after closure
Section 2530	Disposal site suitability requirements for land disposal
Section 2540	Disposal site design for land disposal
Section 2550	Land disposal facility operation and disposal site closure
Section 2560	Environmental monitoring
Section 2570	Alternative requirements for design and operations
Section 2571	Waste classification
Section 2572	Waste characteristics
Section 2573	Labeling
Section 2580	Institutional requirements
Section 2590	Alternative requirements for waste classification and characteristics
Section 2600	Applicant qualifications and assurances
Section 2610	Funding for disposal site closure and stabilization
Section 2620	Financial assurances for institutional controls

Section 2630 Maintenance of records, reports, and transfers

Section 2640 Tests on land disposal facilities

Section 2650 Agency inspections of land disposal facilities

## PART XII LICENSING AND RADIATION SAFETY REQUIREMENTS FOR IRRADIATORS

Section 2660 Purpose and scope

Section 2670 Application for a specific license

Section 2680 Specific licenses for irradiators

Section 2690 Commencement of construction

Section 2700 Applications for exemptions

Section 2710 Request for written statements

Section 2720 Performance criteria for sealed sources

Section 2730 Access control

Section 2740 Shielding

Section 2750 Fire protection

Section 2760 Radiation monitors

Section 2770 Control of source movement

Section 2780 Irradiator pools

Section 2790 Source rack protection

Section 2800 Power failures

Section 2810 Design requirements

Section 2820 Construction monitoring and acceptance testing

Section 2830 Training

Section 2840 Operating and emergency procedures

Section 2850 Personnel monitoring

Section 2860 Radiation surveys

Section 2870 Detection of leaking sources

Section 2880 Inspection and maintenance

Section 2890 Pool water purity

- Section 2900 Attendance during operation
- Section 2910 Entering and leaving the radiation room
- Section 2920 Irradiation of explosive or flammable materials
- Section 2930 Records and retention periods
- Section 2940 Reports

## PART XIII TRANSPORTATION OF RADIOACTIVE MATERIAL

- Section 2950 Purpose and scope
- Section 2960 Requirement for license
- Section 2970 Exemptions
- Section 2980 Transportation of licensed material
- Section 2990 General licenses for carriers
- Section 3000 General license: NRC-approved packages
- Section 3010 Previously approved packages
- Section 3020 General License: United States Department of Transportation specification container
- Section 3030 General License: use of foreign approved package
- Section 3040 General license: fissile material
- Section 3050 [Repealed]
- Section 3051 General license: plutonium-beryllium special form material
- Section 3060 Assumptions as to unknown properties of fissile material
- Section 3070 Preliminary determinations
- Section 3080 Routine determinations
- Section 3090 Air transport of plutonium
- Section 3091 Opening instructions.
- Section 3100 Shipment records
- Section 3110 Reports
- Section 3120 Advance notification of transport of nuclear waste
- Section 3130 Quality assurance

## PART XIV RADIATION SAFETY REQUIREMENTS FOR WIRELINE SERVICE OPERATIONS AND SUBSURFACE TRACER STUDIES

- Section 3140 Purpose
- Section 3150 Scope
- Section 3151 Licensing
- Section 3160 Agreement with well owner
- Section 3170 Limits on levels of radiation
- Section 3180 Storage precautions
- Section 3190 Transport precautions
- Section 3200 Radiation survey instruments
- Section 3210 Leak testing of sealed sources
- Section 3220 Physical inventory
- Section 3230 Utilization records
- Section 3240 Design, performance, and certification criteria for sealed sources used in downhole operations
- Section 3241 Tritium neutron generator target sources
- Section 3250 Labeling
- Section 3260 Inspection and maintenance
- Section 3261 Radioactive markers
- Section 3262 Uranium sinker bars
- Section 3270 Training requirements
- Section 3280 Operating and emergency procedures
- Section 3290 Personnel monitoring
- Section 3300 Security
- Section 3310 Handling tools
- Section 3320 Subsurface tracer studies
- Section 3330 Particle accelerators
- Section 3340 Radiation surveys and contamination control
- Section 3350 Documents and records required at field stations

- Section 3360 Documents and records required at temporary jobsites
- Section 3370 Notification of incidents, abandonment, and lost sources

## PART XV THERAPEUTIC RADIATION MACHINES

- Section 3380 Purpose and scope
- Section 3390 General administrative requirements for facilities using therapeutic radiation machines
- Section 3400 General technical requirements for facilities using therapeutic radiation machines
- Section 3410 Quality management program
- Section 3420 Therapeutic radiation machines of less than 500 kV
- Section 3430 Therapeutic radiation machines -- photon therapy systems (500 kV and above) and electron therapy systems (500 kV and above)
- Section 3440 Calibration of survey instruments
- Section 3450 Shielding and safety design requirements
- Section 3451 Quality assurance for radiation therapy simulation systems
- Section 3452 Electronic brachytherapy
- Section 3453 Other use of electronically produced radiation to deliver therapeutic radiation dosage

## PART XVI REGULATION AND LICENSING OF TECHNOLOGICALLY ENHANCED NATURALLY OCCURRING RADIOACTIVE MATERIALS (TENORM)

- Section 3460 Purpose
- Section 3470 Scope
- Section 3480 Exemptions
- Section 3490 Standards for radiation protection for TENORM
- Section 3500 Protection of Workers During Operations
- Section 3510 Release for unrestricted use
- Section 3520 Disposal and transfer of waste for disposal
- Section 3530 General license
- Section 3540 Specific Licenses
- Section 3550 Filing application for specific licenses
- Section 3560 Requirements for the issuance of specific licenses

- Section 3570 Safety Criteria for Products
- Section 3580 Table of organ doses
- Section 3590 Issuance of Specific Licenses
- Section 3600 Conditions of specific licenses issued under 12VAC5-481-3560
- Section 3610 Expiration and termination of specific licenses
- Section 3620 Renewal of specific licenses
- Section 3630 Amendment of specific licenses at request of licensee
- Section 3640 Agency action on applications to renew and amend specific licenses
- Section 3650 Modification and revocation of specific licenses
- Section 3660 Reciprocal recognition of specific licenses
- Section 3670 [Repealed]

## PART XVII SCHEDULES

- Section 3680 Assigned protection factors for respirators
- Section 3690 [Repealed]
- Section 3700 Quantities of licensed materials requiring labeling
- Section 3710 Requirements for transfers of low-level radioactive waste intended for disposal at licensed land disposal facilities and manifests
- Section 3720 Exempt concentrations schedule
- Section 3730 Exempt quantities
- Section 3740 Quantities of radioactive materials requiring consideration of the need for an emergency plan for responding to a release
- Section 3750 Quantities for use with decommissioning
- Section 3760 Limits for broad scopes
- Section 3770 Determination of A1 and A2
- Section 3780 Nationally tracked source thresholds
