

September 8, 2010: Gulf Nuclear Model 71-2A Source: Model 71-2A Neutron Well Logging sources will be losing its special form certificate in the near future. For those licensee possessing these sources there are a few options for disposition of these sources. Gulf Nuclear has issued the following notice: [Gulf Nuclear Notice](#) and The Department of Energy's Off-Site Source Recovery Project (OSRP) has issued the following notice: [OSRP Notice](#).

January 7, 2010: On December 18, 2009 the NRC issued a press release ([NRC Safety Culture Notice](#)) relating to a draft policy on "safety culture". The Federal Register, Vol. 74, No. 214 dated November 6, 2009 (found at: [NRC-2009-0482](#)) included the NRC draft policy statement. This federal register notice began a 90 day public comment period. The NRC will also be hosting public workshops in February, April and October. The information was published in the Federal Register, Vol. 74, No. 239 dated December 15, 2009 (found at: [NRC-2009-0485](#)). If you are interested in participating, contact the NRC. More information can be found at the NRC's safety culture webpage ([NRC Safety Culture Page](#)).
