VIRGINIA STATE OFFICE OF RURAL HEALTH

Innovative Rural Programming Awards

For 30 years, the VA-SORH has provided funding that bridges small, rural communities to state and federal resources with the goal of developing long-term solutions to address the root causes of rural health disparities. One way the VA-SORH accomplishes this goal is by awarding funds to grant sub-recipients or “grantees”. Each grantee utilizes the funding to implement innovative programming in rural communities across the Commonwealth.
