HPSA Find by County-Navigation and Uses:

HPSA Find is a site managed by HRSA. It is the closest we have to a real-time HPSA status resource. Currently, it takes a matter of days between when a HPSA designation is approved and when it is listed on the HPSA Find site. The following link allows users to search by county and find all HPSAs associated with that locality. The results can be further refined to include only certain types of HPSAs, score ranges, or approval dates. Those results can then be downloaded to an Excel spreadsheet or a .pdf.

<https://data.hrsa.gov/topics/health-workforce/shortage-areas/hpsa-find>

Step 1: Select state and county of interest

The screenshot shows the HPSA Find website interface. The search filters for "Select a State/Territory (required)" and "Select County(s) (required)" are highlighted with a red box. The "Submit" button is also visible. The main content area shows a table with columns for Discipline, HPSA ID, HPSA Name, Designation Type, Primary State Name, County Name, HPSA FTE Short, HPSA Score, PC MCTA Score, Status, Rural Status, Designation Date, and Update Date. The table currently displays "No data available in table".

Example: If you were to select Accomack County without adjusting the default filters you would see all active HPSA designations associated with that locality.

The screenshot shows the HPSA Find website interface with search filters set to Virginia and Accomack County. The results table shows 6 active HPSA designations for Accomack County, Virginia.

HPSA Find by Address-Navigation and Uses:

HPSA Find by Address is a site managed by HRSA that only shows if a site is located within a community level HPSA or Medically Underserved Area or Population (MUA/P). If a user seeks information on an Auto-HPSA site (such as Federally Qualified Health Centers, Look-a-likes, IHS certified Tribal clinics and hospitals, and Rural Health Clinics) a query from HPSA Find by Address will not produce the site specific HPSA information, only the community-level HPSAs associated with the street address. For the site specific HPSA information, a user should do a county level search on the other HPSA Find site (discussed on pages 2-6 of this manual).

Atlantic Community Health Center Accomack County search results in HPSA Find.

The screenshot shows the HPSA Find website interface. On the left, there is a dropdown menu for "Select County(s) (required)" with "Accomack County" selected. The main content area displays a table of search results. The first row is highlighted and shows details for a site in Accomack County, VA. Below this, a table lists three sites: Atlantic Community Health Center, Atlantic Community Pharmacy, and CHINCOTEAGUE ISLAND COMM HLTH CTR.

HPSA has had a break in designation status: N

Note: The address entered is geocoded and then compared against the HPSA data in data.HRSA.gov. Due to geoprocessing limitations, the designation cannot be guaranteed to be 100% accurate and does not constitute an official determination. If you feel the result is in error, please contact the Centers for Medicare & Medicaid Services

A note on “proposed for withdrawal” status and CMS Physician Bonus Payments:

Unless the HPSA designation has a status of being officially withdrawn, the bonus payment will still be applied. Geographic or High Needs HPSA designations assigned as “proposed for withdrawal” during the September 2025 National Shortage Designation Update (NSDU), either legitimately or because there are replacement designations still being reviewed by HRSA, will **not** be formally withdrawn until the publication of the Federal Registry Notice (FRN), in June 2026. According to our CMS point of contact, Geographic and High Needs HPSAs that are now Proposed for Withdrawal would see their HPSA bonus payments end on 01/01/27, if they cannot be successfully replaced with another eligible HPSA.

Primary Care Office

The Virginia Office of Health Equity serves as the Primary Care Office (PCO). The goal of the U.S. Department of Health and Human Services Primary Care Office Cooperative Agreement Program is to assure the availability of quality health care to low income, uninsured, isolated, vulnerable and special needs populations and to meet these populations' unique health care needs. Virginia's PCO accomplishes this through the following:

- Fostering collaboration across and within various levels of government, communities, and non-profit organizations
- Identifying communities with the greatest unmet health care needs, disparities, and health workforce shortages; identifying the key barriers to access to health care for these communities; and working toward solutions
- Supporting the Virginia Community Healthcare Association [Virginia's Primary Care Association (PCA)] by providing information to assist in their development of a plan to manage the growth of health centers in Virginia
- Supporting and enhancing the primary care workforce in the state through **shortage designations**, recruitment and retention activities, and administration of scholarship and loan repayment programs

HOI in the Virginia Data Commons:

https://uva-bi-sdad.github.io/vdh_rural_health_site/?selected_variable=segregation_indicator_geo20

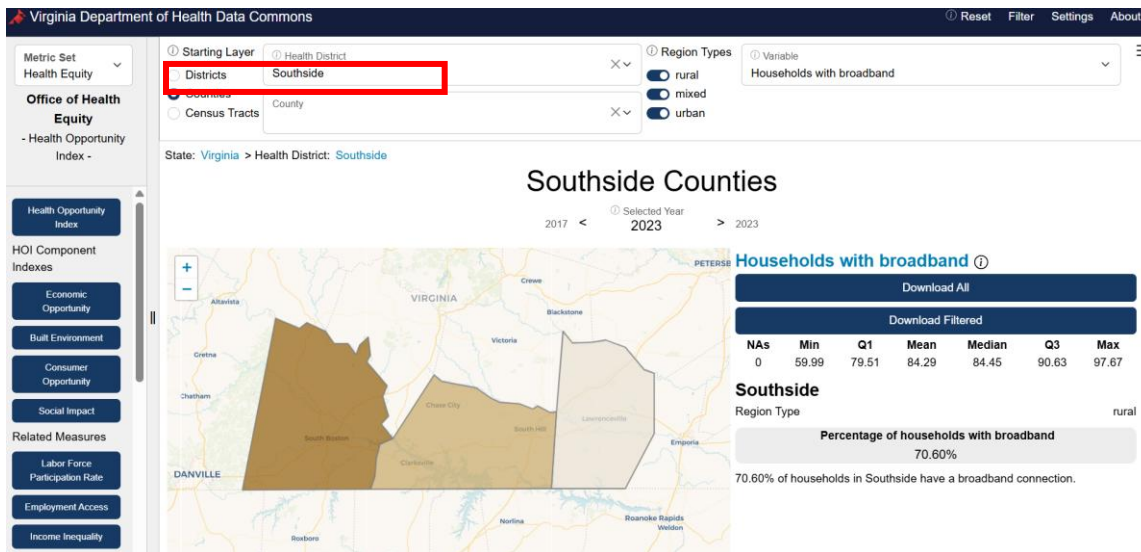

Look at the component variables making up the HOI using either the dropdown to the upper right of the page or the blue buttons to the right.

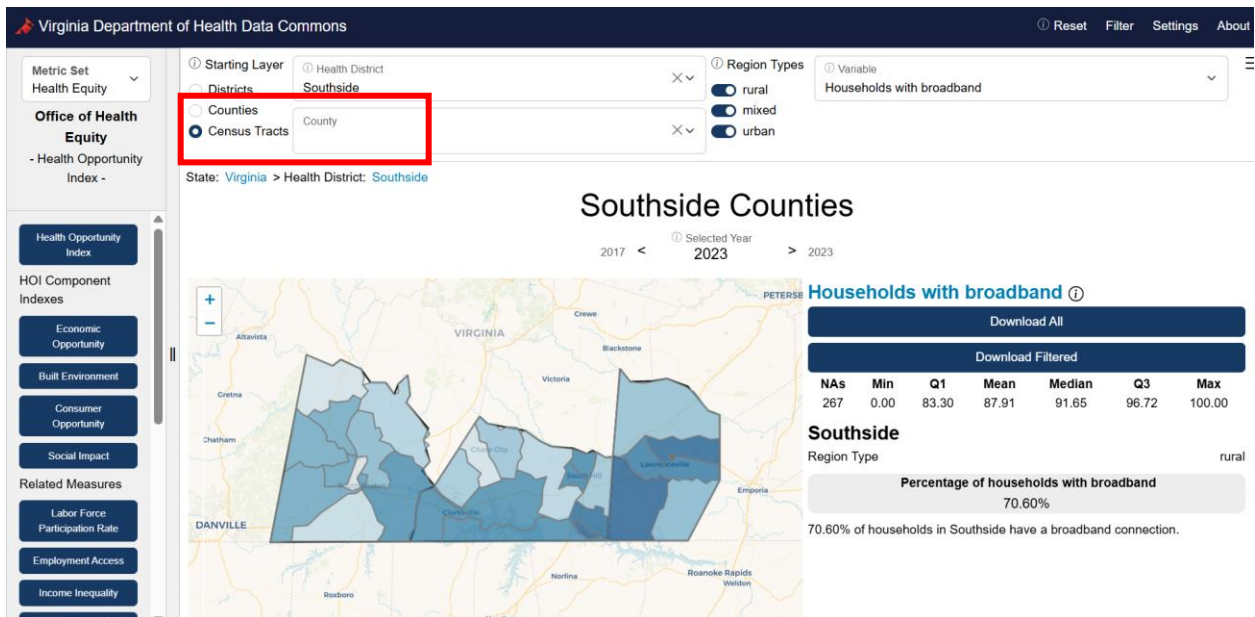

Use the toggle switches to pull out localities with varying degrees of rurality.

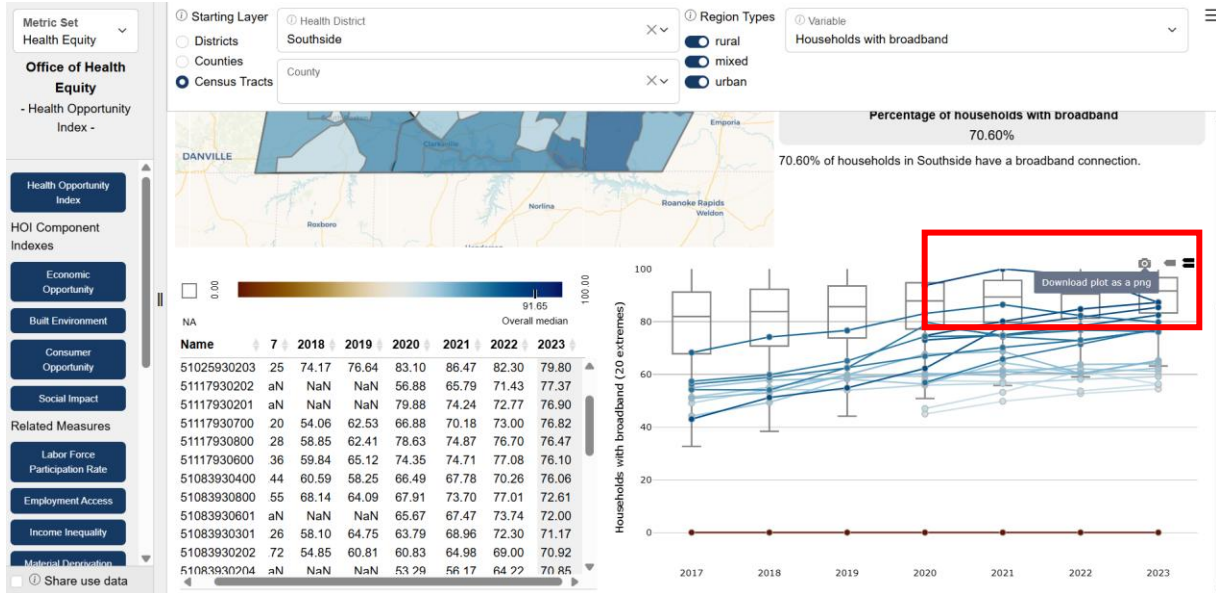

Use the dropdown to the right to pull out specific districts.

Select either "Counties" or "Census Tracts" to view data.

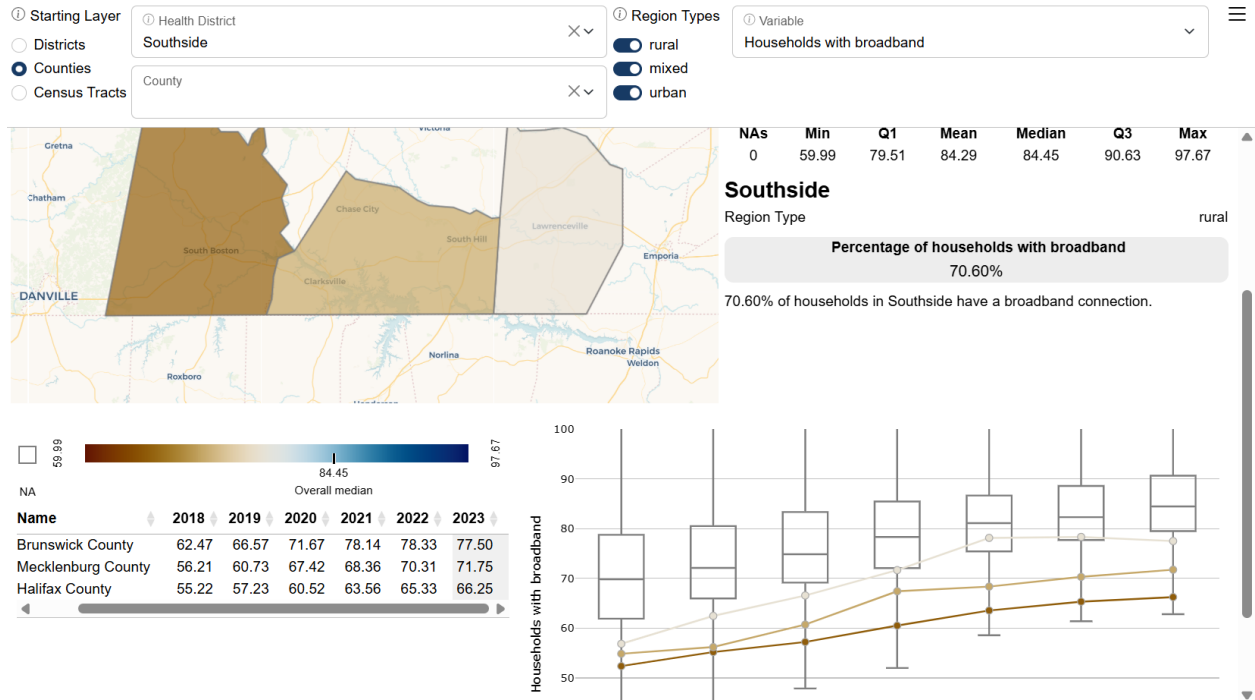

Download plot of coverage rates by year for selected data as follows.
