

# CSHD COVID-19 Vaccination Efforts - Week of March 8th

## Vaccine Planning Considerations:

It is important to take the following into consideration when looking at district vaccine distribution efforts:

- The distribution of vaccine from the federal government to Virginia has been limited, which has affected the ability of local health departments and community partners to obtain vaccine to offer to priority groups.
- We expect vaccine availability to be limited over the next few months.
- CSHD is working with our local healthcare partners to increase our community capacity to vaccinate individuals in Phase 1b.

## Total COVID-19 Vaccines Given by CSHD

# 37,750

\*as of 3/12/2021

*The data provided only reflects COVID-19 vaccinations performed by the Central Shenandoah Health District and are not a reflection of total COVID-19 vaccines given within the health district.*

- K-12 education/daycare
- Essential workers
  - Food and Ag, Manufacturing, Grocery Store Workers
- Persons aged 65 years+
- Persons aged 50-64 with high risk health conditions or disabilities

Date	Daily Number of COVID-19 Vaccines Distributed by CSHD
Mon, March 8	3,320
Tues, March 9	1,300
Weds, March 10	2,350
Thurs, March 11	240
Fri, March 12	1,500
<b>Weekly Total</b>	<b>8,710</b>

## DON'T FORGET-STAY VIGILANT!

COVID-19 is in our community. To stop the spread, everyone should continue to:

- Wear a face mask when around people you don't live with
- Avoid social gatherings and keep 6ft. distance between you and others
- Wash your hands and cover your cough

**It is crucial that everyone takes these prevention measures, even after you get vaccinated!**

## Central Shenandoah Health District:

- Our district comprises of 5 counties and 5 cities:  
*Rockingham, Augusta, Rockbridge, Bath & Highland Counties*  
*Harrisonburg, Staunton, Waynesboro, Lexington, Buena Vista Cities*
- Due to the differences in populations and resources in the five counties and five cities that make up the district, some areas may move into the different vaccination phases faster than others. We should also expect overlap in the phases as we work through the vaccination process.
