How do I request a screening?

Please call 757-382-8705 and ask for an appointment for a long-term care screening. There are no requirements in order to receive a screening. A nurse and a social worker will come out to your home at your scheduled appointment time. If you are requesting a screening for a child, a nurse will come to your home.

Who is eligible?

Screenings are open to ALL ages and can be requested by any individual.

Screening criteria:

The Uniform Assessment Instrument (UAI) is used to assess your need for services. The following items will be considered during a screening:

- Your need for assistance with activities of daily living such as bathing, dressing, toileting, transferring, eating, mobility, joint motion, medication administration, and behavior and orientation pattern.

- A medical and/or nursing need requiring a licensed medical professional to oversee your care on a daily basis.

- Your risk of being admitted to a nursing facility within 30 days, if you do not receive community-based home care services.

How will I know if I am approved?

You will receive a letter from the Health Department within 2 weeks letting you know if you met the qualifications and were approved for waiver services.

What options do I have, if I am approved?

1. You have the option of home health services. We will provide you with a provider list during the screening.

2. If you are 55 years and older, you have the option of the Sentara PACE program. This is another choice for nursing home eligible individuals who prefer to live at home.

3. You also have the option of nursing facility placement, especially if no safe plan of care can be developed for you in the community.

Long-Term Care Screening

(For the CCC Plus Waiver)

Assessing the eligibility for care in the home or in a nursing facility.
