

Access to Health Insurance

SCAN ME

Health insurance coverage has a direct impact on a person's health. Uninsured or underinsured people are more likely to postpone health services, or forgo them altogether, which can lead to severe consequences.

Barriers to Healthcare from survey respondents

1. Too Expensive
2. Difficulty Finding Help
3. Health Insurance

Spanish-language survey respondents were significantly more likely to report having no insurance (79.6%) than those who responded in English (4.1%).

In my home no one has medical insurance. My family has no insurance.
