CHICKAHOMINY
HEALTH DISTRICT

Introduction

The 2024-2028 Charles City County Community Health Improvement Plan (CHIP) Year 2 Annual Report reviews the progress of all strategies and objectives completed or updated during the second year of implementation. All updates were provided by the lead organizations involved in drafting the [2024-2028 Charles City County CHIP](#) report. The CHIP is a long-term systematic effort that focuses on the top three health priorities identified by the community. The priorities were based on the results of the [2023 Charles City County Community Health Assessment](#) (CHA) that included input from residents, nonprofits, faith-based groups, county agencies, healthcare organizations, and business leaders. The three priority areas of the CHIP are: 1) Healthcare Access and Quality; 2) Economic Stability, Infrastructure and Workforce Development; 3) Childhood Health and Education. The CHIP is a living document and can be changed throughout the five-year plan. This annual report covers the period from July 1, 2025 to June 30, 2026. Evaluating implementation efforts is an important part of sustaining improvements and supporting our community partners as they work to ensure their efforts are leading to the health impacts they intended.

Implementation timeline

Goals for Charles City CHIP

	Healthcare Access and Quality	Goal 1: To improve access to preventive health services, including primary care, telehealth, health screenings, vaccinations, health education, and dental services in Charles City County.
		Goal 2: To build trust among Charles City County community members by sharing clear, easily accessible information widely through culturally sensitive education, engagement, and outreach.
		Goal 3: To enhance cross-organization care coordination efforts by developing and strengthening partnerships between healthcare and community organizations to address social determinants of health and improve health outcomes.
	Economic Stability, Infrastructure, and Workforce Development	Goal 4: To improve economic stability for Charles City County community members through increased job opportunities, growth, and resources to meet their needs.
		Goal 5: To ensure sustainable infrastructure and utilities within Charles City County to meet the needs of existing and new residential, commercial, and industrial developments.
		Goal 6: To promote Charles City County as an attractive location for a variety of businesses to grow and offer high-quality jobs to community members.
	Childhood Health and Education	Goal 7: To increase access to health and wellness services and resources for children and youth in Charles City County.
		Goal 8: To increase resources available to staff and students that provide the younger population with educational opportunities, activities, and resiliency.

Process for Monitoring and Evaluation

The Chickahominy Health District (CHD) is responsible for providing technical support, collecting and monitoring data, and sharing the results with the public and community partners. The Charles City CHIP Steering Committee meets twice a year to address these components:

1. Share and document key successes to highlight progress made.
2. Identify barriers impacting strategy implementation and discuss actionable solutions to get back on track.

At the end of each quarter, CHD's Community Health Team sends out an electronic newsletter to community members on Charles City CHIP progress. The newsletter includes:

- Message from the Community Health Team
- CHIP Strategy Scorecards
- Next Meeting Details
- Health Priority Highlights
- How to Submit a New Strategy

Don't miss out! Click on [Charles City County Quarterly CHIP Updates Sign-Up Link](#) to get our e-newsletter delivered to your inbox.

Get Involved

The CHIP acts as a roadmap of change that outlines how to address health issues and topics. However, meaningful change does not happen overnight. This work needs support from the community and collaboration across multiple sectors to lead to long-lasting impacts on the health and quality of life of the community.

If you are interested or know someone who would be interested in getting involved, please consider contacting the Chickahominy Health District's Community Health Team at CHDWellness@vdh.virginia.gov to serve on the Steering Committee.

Overall Progress of Strategies: July 1, 2025 – June 30, 2026

The figure below shows the progress of all strategies for the three priorities: 1) **Healthcare Access**; 2) **Economic Stability, Infrastructure, and Workforce Development**; and 3) **Childhood Health and Education**. Out of the 23 strategies in the CHIP, 8 are currently in progress, 7 have been completed, 4 have been considered incomplete, and 4 have been removed in Year 2. A new strategy was also added to the community health improvement plan during Year 2.

Figure 1: Charles City CHIP overall strategy progress bar graph.

Priority 1: Healthcare Access and Quality Updates

Progress on Annual Objectives

Objectives connect to the outcomes we aim to accomplish and the changes we hope to achieve. They also help quantify the goals of each of the three priorities described on page 3. For the sources of each annual objective, please refer to the [Charles City County 2024-2028 Community Health Improvement Plan](#). Indicators are the specific measures used to track progress towards a target. The “Outcome/Result” reflects what was accomplished in Year 2, while the “Target” represents the specific results we intended to achieve in Year 2.

Progress Status:		Met or exceeded target.		Target was not met, progress was made.		Did not meet target.
-------------------------	---	-------------------------	---	--	---	----------------------

Importance to our Community: *Access to affordable, high-quality health care is crucial for a person’s physical, social, and mental well-being. Health insurance, local care options, and a regular medical provider (medical home) work together to provide this access.*

		Year 2			
Objective	Indicator	Target	Outcome/Result	Progress Status	Explanation of Status
Objective 1.1: By June 30, 2028, decrease the number of avoidable hospitalizations among Charles City County community members from 1,080 per 100,000 people to 800 per 100,000 people.	Avoidable Hospitalizations	939.74 per 100,000	1,8277.77 per 100,000		Although this objective value is higher than the target, the outcome/result has not increased as much from the baseline value in 2024 (1,080 per 100,000) and because this comes from secondary data it may not be a true reflection of the work being conducted within the county.
Objective 1.2: By June 30, 2028, increase the percentage of youth in the Central Region	Annual Youth Dental Visit Rate	71.5%	66.1%		Regional data is now available for the 2023 survey results. We are comparing this to 2021 data due to

who saw a dentist annually from 68.0% to 75.0%.					the value also being at the regional level. In 2021, dental visit rates among youth were 67.9% compared to 2023 at 66.1%.
Objective 2.1: By June 30, 2028, increase the percentage of adults (18+) in Charles City County who had a routine checkup in the past year from 80.5% to 84.0%.	Last Routine Checkup	82.3%	84.7%		The counts for the available 2024 data were <20 at the county level, so district-wide data was used for this year. Because the majority of CHD is rural, using data at the district level can be a good representation of what is occurring within the counties. This objective is on track as the baseline value was 80.5%.
Objective 3.1: By June 30, 2028, decrease the percentage of the population under age 65 without health insurance from 15.0% to 9.0% in Charles City County.	Uninsured	12.0%	9.6%		This objective is on track and has surpassed the target for the first CHIP year. The baseline value was 15.0% of the population under age 65 without health insurance.
Objective 3.2: By June 30, 2028 decrease the percentage of the population 55 and older who felt lonely from 34.0% to 25.0%, and those who felt isolated from 40.0% to 30.0%.	Loneliness and Isolation	N/A	N/A		This survey will be issued again when the 5-year CHIP ends and will not be measured annually. The baseline values for loneliness were 34.0% and isolation at 40.0%.

Overall Status of Healthcare Access Strategies

Strategy 1: By March 31, 2025, Charles City County Fire/EMS will determine if they are able to establish a paramedicine program to improve access to preventive services and address the needs of rural residents more efficiently.

✗ Year 2 Status: Removed. This strategy was removed during Year 2 of the CHIP. The Charles City County Fire/EMS Department initially began exploring the requirements for implementing a community Mobile Medicine/Paramedicine program, including attending a conference in September 2024 to learn more about program development and implementation. However, due to budget constraints and limited resources, the department is unable to move forward with the program at this time. As a result, the department has requested that this strategy be removed.

Healthcare Access and Quality
Annual Strategy Status Overview

Strategy 2: By March 31, 2025, the Charles City Health Department will be “relaunched” to the community with an open-house, list of services, and updated facility features.

✓ Year 2 Status: Complete. This strategy was completed during Year 1 of the CHIP. During Year 1, a team was formed to plan and coordinate the Open House, which was held in October 2024. The event welcomed approximately 75 community members, including children, and featured flu vaccinations, tours of the newly renovated space, children’s activities, and informational stations highlighting the programs and services available through the Chickahominy Health District. Since the Open House was successfully completed during Year 1, no additional activity was needed for this strategy during Year 2.

Strategy 3: By December 31, 2025, Central Virginia Health Services (CVHS) will conduct an assessment of available school-based dental programs/models to determine the feasibility of implementation within the Charles City Public Schools.

✗ Year 2 Status: Incomplete. No updates were provided for this strategy during Year 2; therefore, it remains incomplete for the second year. Updates and progress will continue to be monitored and requested moving forward.

Strategy 4: By June 30, 2028, Charles City County Department of Social Services will host two Community Resource Fairs to offer a variety of preventive services, increase awareness of services available, and coordinate mobile health units at least every other year in Charles City County.

Year 2 Status: In Progress. The Community Resource Fair is planned to occur every other year. The most recent fair was held on April 13, 2024, and the next event is now anticipated for Spring or Summer 2027, pending available funding and planning capacity. While no progress was reported during Year 2, the strategy remains in progress, and updates will be sought again in Fall 2026 as planning for the next fair begins.

Strategy 5: By June 30, 2025, the Prevention Multidisciplinary Team (MDT) will develop an online directory for the community and partner organizations to use for health-related referrals.

Year 3 Status: Complete. This strategy was completed during Year 1 of the CHIP. The Prevention MDT has an online directory on the Charles City County website. It has information on how to access services for physical health, mental health, and overall wellness. This strategy has been achieved and the link to the directory is on the county website at <https://www.charlescityva.us/529/Prevention-Multidisciplinary-Team>.

Strategy 6: By June 30, 2025, Charles City County will re-establish a coalition focused on top health issues to improve health across the continuum in Charles City County.

Year 2 Status: In Progress. The Chickahominy Health District is pleased to announce the confirmed co-facilitators for the Charles City Health Coalition. A big thank-you to VCU Health System and the Charles City NAACP Health Committee for stepping into these leadership roles. Planning meetings are now underway, and we're excited to begin outreach to prospective coalition members as we move this important work forward.

Strategy 7: By September 30, 2024, Chickahominy Health District and CVHS will meet to explore how the Community Health Workers could partner to improve care coordination and address social determinants of health.

Year 2 Status: Complete. This strategy was completed during Year 1 of the CHIP. CHD and CVHS met in the early summer of 2024 at the Charles City Library to discuss different roles and how they can collaborate. For example, CHD's community health staff were coordinating with CVHS to help distribute car seats to a neighboring health district and now that district has established a LISSDEP program.

Strategy 8: By December 31, 2024, Chickahominy Health District will meet with local and regional animal shelters to discuss promoting pet fostering programs/outreach to enhance the social wellness for older adults.

 **Year 2 Status: Removed.** This strategy was removed in the last quarter of Year 1. CHD staff connected with a successful fostering program, Paws Across Pittsburgh, and were working with the New Kent Humane Society to work out the logistics of starting a similar program in Charles City and New Kent counties. However, the primary barrier at this time is the need for a designated point of contact (POC) to help coordinate the Senior Fostering Program. Charles City County has expressed interest in developing a joint Senior Fostering application with New Kent; however, New Kent is currently exploring an independent approach. Efforts have been made to raise awareness of the Fostering Program through the Span Center and the Chickahominy TRIAD by sharing volunteer opportunities and encouraging community involvement. New Kent is continuing to seek a volunteer who can serve as the program's POC and provide support to seniors who are currently fostering or interested in fostering. As of the end of March, marketing efforts for the Fostering Program have not yet begun. This strategy has been removed from the Charles City improvement plan and added to New Kent County's Community Health Improvement Plan.

Achievements and Challenges for Healthcare Access and Quality

Achievements

The Chickahominy Health District has confirmed co-facilitators for the Charles City Health Coalition.

A big thank-you to VCU Health System and the Charles City NAACP Health Committee for stepping into these leadership roles. Planning meetings are now underway, and we're excited to begin outreach to prospective coalition members.

Challenges

The following are some challenges experienced during Year 2 of the Charles City CHIP:

- Budget restraints.
- Staffing shortages.
- Competing priorities.

Priority 2: Economic Stability, Infrastructure, and Workforce Development Updates

Progress on Annual Objectives

Objectives connect to the outcomes we aim to accomplish and the changes we hope to achieve. They also help quantify the goals of each of the three priorities described on page 3. For the sources of each annual objective, please refer to the [Charles City County 2024-2028 Community Health Improvement Plan](#). Indicators are the specific measures used to track progress towards a target. The “Outcome/Result” reflects what was accomplished in Year 2, while the “Target” represents the specific results we intended to achieve in Year 2.

Progress Status:		Met or exceeded target.		Target was not met, progress was made.		Did not meet target.
-------------------------	---	-------------------------	---	--	---	----------------------

Importance to our community: *Economic stability is important because it supports job growth, strengthens local businesses, and ensures residents have the resources they need to thrive within their communities.*

		Year 2			
Objective	Indicator	Target	Outcome/Result	Progress Status	Explanation of Status
Objective 4.1: By June 30, 2028, Charles City County will increase the percentage of the population 16 years of age and older in the civilian labor workforce from 57.8% to 60.0%.	Employment – Labor Force Participation Rate	58.9%	2023 ACS 5-year: 56.3% 2024 ACS 5-year: 55.8%		We are using 2023 ACS 5-year estimates & 2024 ACS 5-year estimates (Due to the changes that occurred last year, the 5-year estimates have changed. These objective is still considered on track towards the target at the end of the CHIP).

Objective 5.1: By June 30, 2028, Charles City County will increase the percentage of households that had broadband internet connection from 67.0% to 80.0%.	Broadband Access	73.5%	75.0%		This objective is on track and has continued to increase from the baseline value of 67% of households having broadband connection.
Objective 6.1: By June 30, 2028, Charles City County will record at least 25 new non-employer businesses and at least 5 employer businesses.	County Business Patterns	153 establishments (across all sectors)	2 New Employer Businesses		The data release for 2024 data will occur in the fall of 2026. This objective will remain on track until the new update is available and the status can be updated.

Overall Status of Economic Stability, Infrastructure, and Workforce Development Strategies

Strategy 1: By June 30, 2028, Charles City County will organize at least one job fair, career expo, and recruitment event in partnership with local employer, including the Charles City County Public Schools, industry associations, and workforce development agencies to showcase job opportunities, conduct on-the-spot interviews, and facilitate job matching and placement for job seekers, at least once a year.

✗ Year 2 Status: Removed. Due to staffing changes, there is currently no designated lead for this strategy. As a result, the strategy will be temporarily removed until a new lead can be identified.

Strategy 2: By September 30, 2024, Charles City County will adopt/approve the Charles City Economic Development and Tourism Strategic Plan.

✓ Year 2 Status: Complete. This strategy was completed during Year 1 of the CHIP. The strategic plan was adopted May 2, 2024, by the Economic Development Authority. It is posted on the economic development website www.yescharlescityva.com.

Strategy 3: By June 30, 2028, Charles City County will expand broadband infrastructure for rural residents of Charles City County.

✗ Year 2 Status: Incomplete. The county was contacted to identify a point of contact for this strategy and to request an update on progress. No response has been received to date, so we are counting this strategy as incomplete. This strategy may need to be removed within the next year if no updates are provided.

Economic Stability, Infrastructure, and Workforce Development Strategy Progress Snapshot

Strategy 4: By March 31, 2028, Charles City County will conduct a comprehensive assessment of existing infrastructure to identify deficiencies and prioritize upgrades.

 **Year 2 Status: Incomplete.** The county was contacted to identify a point of contact for this strategy and to request an update on progress. No response has been received to date, so we are counting this strategy as incomplete. This strategy may need to be removed within the next year if no updates are provided.

Strategy 5: By June 30, 2028, Charles City County will complete an update to the Comprehensive Land Use Plan to prepare for future developments, challenges, and opportunities.

 **Year 2 Status: Incomplete.** The county was contacted to identify a point of contact for this strategy and to request an update on progress. No response has been received to date, so we are counting this strategy as incomplete. This strategy may need to be removed within the next year if no updates are provided. The county has established a Citizens Advisory Committee to help develop the new Comprehensive Plan. For ongoing updates on the new Comprehensive Plan progress, visit the [Comprehensive Plan Page](#).

Strategy 6: By March 31, 2028, at least four new businesses from Charles City County will join the Hopewell/Prince George Chamber of Commerce to receive additional support and resources to grow their locally owned businesses and advance the economic well-being of the community.

 **Year 2 Status: Removed.** Due to staffing changes, there is currently no designated lead for this strategy. As a result, the strategy will be temporarily removed until a new lead can be identified.

Achievements and Challenges for Economic Stability, Infrastructure, and Workforce Development

Achievements

The county conducted outreach to local partners to schedule a job fair for the following year.

Staff invited local businesses to the Chamber mixer on October 15 to gauge interest in joining the Chamber.

Challenges

The following are some challenges experienced during Year 2 of the Charles City CHIP:

- Staff changes.
- Removal of strategies.
- Communication between offices/organizations.

Priority 3: Childhood Health and Education Update

Progress on Annual Objectives

Objectives connect to the outcomes we aim to accomplish and the changes we hope to achieve. They also help quantify the goals of each of the three priorities described on page 3. For the sources of each annual objective, please refer to the [Charles City County 2024-2028 Community Health Improvement Plan](#). Indicators are the specific measures used to track progress towards a target. The “Outcome/Result” reflects what was accomplished in Year 2, while the “Target” represents the specific results we intended to achieve in Year 2.

Progress Status:		Met or exceeded target.		Target was not met, progress was made.		Did not meet target.
-------------------------	---	-------------------------	---	--	---	----------------------

Importance to our community: *Childhood health and education are essential to a thriving community because they support lifelong health, academic success, economic opportunity, and overall community well-being.*

		Year 2			
Objective	Indicator	Target	Outcome/Result	Progress Status	Explanation of Status
Objective 7.1: By June 30, 2028, decrease the percentage of youth that attempted suicide from 8.7% to 6.6% in the Central Region.	Attempted Suicide	7.7%	10.2%		It is important to note that the denominator for the 2023 Youth Survey is much smaller than the 2021 survey. This does not reflect an accurate comparison year-to-year.
Objective 7.2: By June 30, 2028, decrease the infant mortality rate among the Black population from 19 per 1,000 live births to 10 per 1,000 live births in Charles City County.	Infant Mortality	14.8 per 1,000 live births	0 per 1,000 live births		Data was suppressed for Charles City County. <i>When broken down by race/ethnicity, the counts were <5.</i> This objective is considered as on track.

Objective 8.1: By June 30, 2028, increase the high school graduation rate from 94.0% to 100.0% in Charles City County.	High School Graduation Rates	97.0%	82.0%		Although the graduation rates fell below the target, it is important to note that class sizes may differ year-to-year.
Objective 8.2: By June 30, 2028, increase the percentage of youth in the Central Region who can identify at least one teacher or other adult that they can talk to if they have a problem from 67.2% to 73.0%.	Teachers or Adult students can speak to	70.1%	N/A	N/A	This question was not included in the 2023 Youth Survey. Because of this, we may need to revisit this objective and update it with a question that has been included in the available data.

Overall Status of Childhood Health and Education Strategies

Strategy 1: By December 31, 2026, Henrico Mental Health and Development Services will facilitate two sessions of the Ending the Silence Youth Suicide Prevention training in Charles City County Schools for school staff, parents and students.

➡ **Year 2 Status: In Progress.** No progress was made on this strategy; however, communication was initiated with the mental health lead for Charles City Public Schools to support future collaboration and advancement of the strategy. This strategy is being counted as “in progress”.

Strategy 2: By June 30, 2025, Henrico Mental Health and Development Services will facilitate two sessions of the Talk Saves Lives training in Charles City County Schools for the school faculty and parents.

➡ **Year 2 Status: In Progress.** No progress was made on this strategy; however, communication was established with the Mental Health Lead for Charles City Public Schools to support future collaboration. The target completion date will need to be revised, therefore this strategy is also being counted as “in progress”.

Strategy 3: By December 31, 2024, Chickahominy Health District will assess the current home visiting programs available to expecting mothers and new parents in Charles City County.

✓ **Year 2 Status: Complete.** This strategy was completed during Year 1 of the CHIP. A Community Engagement Specialist was hired by CHD in July 2024 to take over this strategy and a list of home visiting programs for Charles City County has been created.

Strategy 4: By June 30, 2028, Thrive Virginia will ensure that at least 75% of participants in the Healthy Families Home Visiting Program in Charles City County will receive their annual well-child visits.

 **Year 2 Status: In Progress.** Throughout Year 2 of the CHIP, 100% of enrolled children had their well-child visits completed. Family Support Specialist provided reminders, transportation to visits and gas cards to assist families with getting to their appointments.

Strategy 5: By December 31, 2024, Chickahominy Health District will meet with Charles City County Fire and Rescue and Sheriff to explore how they could collaborate to distribute car seats and/or booster seats to eligible families.

 **Year 2 Status: Complete.** This strategy was completed at the end of Year 1. CHD staff spoke with Deputy Clinton Robinson from the CC Sheriff's Office about connecting CC County Fire with the appropriate trainers so they could assist with car seat installations. Additionally, CHD met with Sheriff Crawley in May 2025. They hope to schedule car seat events in the future by partnering with other organizations and/or the School Resource Officers.

Strategy 6: By June 30, 2028, Chickahominy Health District will facilitate at least five car seat trainings in Charles City County each year to increase car seat safety.

 **Year 2 Status: In Progress.** During Years 1 and 2 of the CHIP, 11 car seats were distributed to 7 families. This exceeded the overall goal for the strategy.

Strategy 7: By June 30, 2028, Thrive Virginia will provide 36 Project Discovery workshops (9 each school year) for 9th through 12th grade students at Charles City High School to encourage students to graduate from high school and provide resources to help students achieve post-secondary education success.

 **Year 2 Status: In Progress.** This strategy is considered as in progress at the end of Year 2 because it met the goal of the making continued progress each quarter. This will continue to be monitored for the final workshop tally at the end of the five-year CHIP. As of Q2 2026, there have been a total of 26 workshops held.

Strategy 8: By March 31, 2028, the Charles City County Public Schools will participate in three in-school and/or after-school learning opportunities and/or enrichment programs that partner with community organizations each year for students and their families in Charles City County.

 **Year 2 Status: In Progress.** Charles City Public Schools held a Back-to-School Fair on Saturday, August 9, 2025. As of Q4 2025, there have been 6 enrichment events held. Community organizations partnered with the school division to provide students and families with community resources, school supplies, backpacks containing required school materials, activities, and food. The event was well attended, with many school staff participating to engage with students and families prior to the start of the school year. Community partners included local churches, community organizations, schools and parent organizations, public safety agencies, health and human service providers, libraries, businesses, and other local organizations. The event

demonstrated strong community collaboration and provided an opportunity for families to access resources and prepare for the upcoming school year.

Strategy 9 (New Strategy): By December 31, 2025, Charles City County Public Schools will re-establish the School Health Advisory Board (SHAB) to support the development of health policies and promote student well-being by serving as a link between the community and the school.

✓ **Year 2 Status: Complete.** Charles City County Public Schools established a School Health Advisory Board (SHAB) for the 2026–2027 school year. There have been two SHAB meetings held thus far during the school year. SHAB members include teachers, administrators, parents, students, VDH representatives, community health partner representatives, and school counselors. The SHAB is currently working through the process of conducting a needs assessment focused on “health and physical education,” “school health environment,” and “nutrition services.” In addition, SHAB is assisting with the coordination of Every Kid Healthy Week and Project ADAM (Automated Defibrillators in Adam’s Memory). Project ADAM is a national program that educates and equips schools with the personnel, procedures, and automated external defibrillators (AEDs) needed to effectively respond to sudden cardiac arrest events on campus.

Achievements and Challenges for Childhood Health and Education

Achievements

THRIVE VA

In the last four reporting periods, 100% of participants received their annual well-child visits.

LISSDEP Car Seat Program

CHD has distributed 11 car seats to 7 families in Charles City, during the first two years of the CHIP.

Project Discovery at Charles City High School:

Q3 2025: 2 workshops (focused on Project Discovery and Planning for College)

Q4 2025: 6 workshops (focused on resume writing, rights and values, art, and team building)

Q1 2026: 5 workshops (focused on teen activism, healthy relationships, and financial literacy)

Q2 2026: 4 workshops --> One included an end of year trip and a visit to the 2026 RVA Teen Summit. Two Seniors received \$1,500 Scholarchips for college.

Challenges

The following are some challenges experienced during Year 2 of the Charles City CHIP:

- Communication between offices/organizations.
- Progress on some strategies remains pending, as advancement is dependent on responses and follow-up from partner organizations.

Conclusion

As we reflect on the first two years, many local organizations have made excellent progress towards meeting the CHIP objectives and overall goals. We remain committed to collaboration with our partners and the Charles City Steering Committee to address the health priorities. We appreciate their dedication and look forward to continued progress in Year 3. To get involved or subscribe to our quarterly newsletter, please contact CHDWellness@vdh.virginia.gov.
