

# COVID-19: How to Notify Your Contacts

If you have COVID-19, it is important that you notify people you had **close contact** with while contagious\*. This includes everyone who:

- Has been within 6 feet of you for a total of 15 minutes or more over a 24-hour period, or,
- Has been directly exposed to your respiratory secretions (e.g., coughed or sneezed on, shared a glass/utensils, kissed, etc.), or,
- Lives with you, or
- You provide care for.

\*You are considered contagious starting 2 days before you became sick (or 2 days before test specimen collection if you never had symptoms) until you complete isolation.

## Sample message to your close contacts:

“Hi. I have been diagnosed with COVID-19 (or coronavirus). I’m reaching out because when we last met, you may have been exposed. Although most cases of COVID-19 will be mild, the Health Department recommends that you:

- **Stay home (self-quarantine) and monitor your health for 14 days** after we last interacted.
- **Get tested.** Contact your healthcare provider to ask about getting tested because of your exposure. Even if you test negative during your quarantine period, you will still need to complete your full 14-day quarantine before it is safe to go back to work or be around others.
- **Seek medical attention immediately if you have a medical emergency.** Emergency warning signs of COVID-19 include trouble breathing, pain or pressure in the chest, confusion, or bluish lips or face.
- **Keep your distance from others** (at least 6 feet) including in your home if possible. Do not share items with others. Use a separate bedroom and bathroom, if possible.
- **Wear a mask** (also known as a cloth face covering) when around others.
- **Wash your hands often** with soap and water for at least 20 seconds or use an alcohol-based hand-sanitizer.
- **Clean and disinfect high-touch surfaces at least daily** (e.g., doorknobs, light switches, phones, remote controls, etc.).
- **Answer the call.** Expect your [local health department](#) to contact you with more recommendations.
- **If you test positive for COVID-19**, please notify your local health department and your close contacts. Your close contacts will need to receive all the guidance I am providing you today.

*If you have questions, visit [www.vdh.virginia.gov](http://www.vdh.virginia.gov) or call 877-ASK-VDH3*

# COVID-19: How to Notify Your Contacts

**First day of symptoms** (or if you never had symptoms; day test specimen was collected for COVID-19): \_\_\_\_\_

**Subtract two days:** \_\_\_\_\_ (start of contagious period)

## Things to think about. Have you recently:

- Gone to work or school?
- Gone to any in-person appointments?
- Gotten together with others?
- Ridden in a car with others or took public transportation?
- Gone to a store in person?
- Been inside a place of worship?

**List all people in your household while you were contagious** *(including people who live with you, people who may have visited, or people providing in-home services):*
