

# MAPP2Health Data Framework

# How Healthy is Our Community?

## **Developed MAPP Priority Indicators**

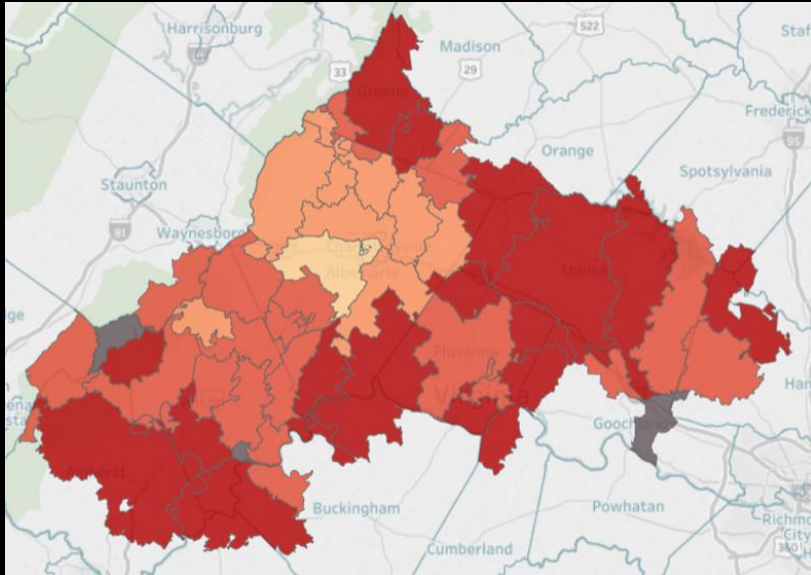

1. Long-term indicators to be measured over time (years)
2. Can't necessarily be addressed by one agency or sector alone
3. ~5 per priority

## **Indicator considerations:**

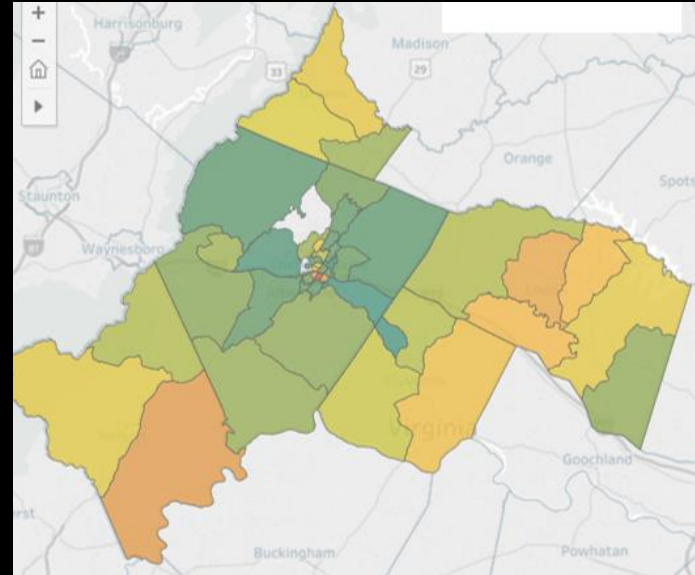

1. Sample size and population
2. Timeliness—is the data recent? Is collection of data ongoing and are there planned data releases?
3. Geography—is the data at a local level (county or smaller)?
4. How well does it address the priority?
5. Overall balance between indicators within the priority.

# Priority Indicators Available Online:

<https://public.tableau.com/profile/thomas.jefferson.health.district#!/>

*Mapping the Prevalence of Obesity in TJHD (2014-2016)*

*Life Expectancy Estimates at Birth by Census Tract (2008-2012)*

# Supplement with Existing Data

- ✓ Demographics
- ✓ Cancer
- ✓ Chronic Disease  
(including diabetes)
- ✓ Opioids

# How Do We Define MAPP Success?

## Process

- ✓ Sharing and discussing MAPP priority indicators as part of the MAPP process.
- ✓ Using data to inform decisions around strategies and action planning.
- ✓ Reviewing MAPP data and other data used by organizations to complete required needs assessments

## Short-term Outcomes

## Long-term Outcomes

- ✓ Positive change / trending in the right direction for priority indicators
