Any desciency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

Resident #9 was administered the psychoactive drug Ativan (an anti-anxiety agent) as needed (PRN) on multiple occurrences without identification of targeted behaviors, monitoring of side effects, and implementation of non-pharmacological behavioral interventions prior to administration.

unnecessary drugs, Resident #9.

The findings included:

Resident #9 was admitted to the facility on 11/25/16 with diagnosis to include, but not limited to Non-Alzheimer's dementia.

The current MDS (Minimum Data Set) a quarterly with an assessment reference date of 5/9/17 coded the resident as scoring a 3 out of a possible 15 on the Brief Interview for Mental Status (BIMS), indicating the resident had severely impaired cognition. Under Section E. Behavior the resident was coded as exhibiting wandering behaviors. No other behaviors were

Results will be shared at monthly QAPI meeting.
