Re: SECOND Request pursuant to Executive Order 52 seeking authorization to add 54 more beds to the 22 already authorized at Southside Regional Medical Center, Petersburg, Virginia (Planning District 19)

Dear Dr. Oliver and Mr. Bodin:

Pursuant to Executive Order 52 issued by Governor Ralph Northam on March 20, 2020 in response to the COVID-19 pandemic situation, Southside Regional Medical Center (“Southside Regional”) is thankful to the State Health Commissioner and DCOPN for the authorization, issued earlier this week on April 13, 2020, to operate 22 temporary additional beds.

However, in light of the fact that plans for an Alternate Care Facility (“ACF”) to serve the needs of the greater Richmond population are unlikely to materialize within the timeframe predicted for peak patient volumes, Southside Regional had to go back and evaluate additional locations for beds that may be required to meet the surge needs of COVID-19 and non-COVID-19 patients at our facility. As a result, Southside Regional is again seeking authorization from State Health Commissioner to operate another 54 temporary additional beds to provide surge capacity and supplement operations to serve the anticipated needs of patients expected during the COVID-19 pandemic emergency. Here are the details for our request.

<u>Hospital Name:</u>	Bon Secours Mercy Health Petersburg LLC d/b/a Southside Regional Medical Center 200 Medical Park Boulevard Petersburg, VA 23805
<u>Hospital License:</u>	H – 1905
<u>Current Approved Capacity:</u>	300 beds 22 additional temporary beds authorized on April 13, 2020
<u>Requested Additional Capacity:</u>	54 intensive care beds Total of 376 beds operational

In accordance with CDC and CMS guidance and Governor Northam’s request, Southside Regional curtailed all non-essential surgery effective March 23, 2020. All predictive analytics models used nationwide show that Virginia and the Richmond area are expected to see a significant increase in hospitalizations related to

COVID-19, longer lengths of stays and increased acuity of hospitalized patients and thus Southside Regional is preparing for a higher level of need that will now not be met through an ACF.

Intensive Care Beds

The 54 new intensive care beds would be located in the following locations:

- the Interventional Radiology holding area will be converted into 3 ICU beds
- the endoscopy/cystoscopy area will be converted into 5 ICU beds
- the operating room suite will be converted into 5 ICU beds
- the main emergency department on campus would convert its bays into 32 ICU beds
- the Southside Regional Emergency Center, located in Colonial Heights, would convert its bays into 9 ICU beds and would temporarily cease operating as a freestanding emergency department.

Should we need to repurpose the ED bays to ICU beds to meet the emergency needs of patient on the hospital campus, Southside Regional would convert its Same Day Surgery area into 34 ED bays.

All the beds are equipped with necessary life safety code requirements such as oxygen, medical gases and vacuum capabilities for safe and effective patient care.

Please note that the different options will be phased in, as needed. If any site of care should change its scope of service (e.g. a freestanding emergency department no longer accepting walk-in or ambulance-transported patients), Southside Regional would communicate this change directly and publicly with all impacted groups – EMS, first responders, patients, and community at large.

Staff in the existing outpatient and emergency departments will be used for the additional ICU beds and provide care in a safe and effective environment of care. Southside Regional and Bon Secours are also planning to use other clinical staff redeployed from outpatient locations in the community which have either temporarily closed or where operations have been severely curtailed. Cross training programs have been developed and staff is already being trained and oriented to potential new roles. Finally, Southside Regional and Bon Secours will endeavor to work with members of the Virginia Medical Reserve Corps, if ultimately necessary dependent on the response demanded by a potential surge of COVID-19 positive patients

Availability of Medical Supplies and Personal Protective Equipment (“PPE”)

As part of Bon Secours Mercy Health, Southside Regional works with sister facilities in Richmond, Hampton Roads, and nationwide for access to all necessary medical supplies and PPE. Currently, the hospital is adequately supplied with necessary medical supplies and PPE and we have rolled out re-processing process for N-95 masks.

Southside Regional stands ready to activate this conversion effective the week of April 27, 2020. Please let me know if you need any additional information to evaluate our second request.

Sincerely,

Donald John Emery
Interim President
