Dear Director,

Virginia Center for Eye Surgery is submitting this letter of intent to apply to expand our outpatient services beyond our current certificate of public need (VA-04082). While we continue to strive to add ophthalmic procedure volume, we have operating room availability that can be used to meet the needs of patients in our community without significant capital investment. We are specifically requesting to expand our approved procedures outside the ophthalmic surgery specialty. We intend to continue to only offer local anesthesia. Minimal capital expenditure is anticipated to be associated with this effort.

I am authorized to respond to questions regarding the application at the contact information provided below.

Sincerely,

A handwritten signature in black ink, appearing to read "Craig Gold".
