The report further stated upon the nurse's arrival to the room the resident was observed sitting on the floor leaning on the right hip with her back against the side of the roommate's bed. The call bell was in the resident's hand but it had not been activated. Prior to the fall the resident had been observed sitting in a stationary chair watching television. At 9:27 a.m. the nurse manager and nurse supervisor were called and after assessing the resident the nurse manager stated to keep the resident on the floor and call 911.</p> <p>On 11/13/20, at 8:40 a.m., an interview was conducted with the certified nursing assistant (CNA) who first observed Resident #4 on the floor on 8/12/20. CNA #6 stated he heard someone screaming for help when he was in another room assisting a resident. CNA #6 stated he followed the calling out which led him to Resident #4's room. CNA #6 stated he thinks the resident was wearing a gown, the resident had no shoes or socks on, doesn't recall a call bell or walker nearby. He stated "I can't fully recall details" then the nurse was notified.</p> <p>An interview was conducted with the Licensed</p>	F 689	<p>include current interventions to address the recent exit. Resident has had no further incidents of unsafe wandering or elopement.</p> <p>B1. An audit of resident falls with injury for the period 8/1/20 through 12/7/20 began on 11/17/20 to determine the investigations were thorough and care plans were updated appropriately. All identified issues will be corrected as needed. Care Plan interventions will be updated in the Kardex and task bar for direct caregivers.</p> <p>B2. An audit of residents who were assessed as a high risk for elopement was completed on 11/11/20. Residents who scored high risk, ambulatory, and wander guard issued their pictures and profile were updated in the elopement book located at the front desk and each unit. The care plans were reviewed for appropriate interventions in place. For those residents who scored high risk though no wander guard issued, a note was placed in the EMR indicating the rationale why no wander guard was in place.</p> <p>C1. Education on conducting a thorough investigation and sustaining a culture of safety that is responsive to residents' risks and needs began on 12/7/20 by the long term care consulting group for nursing, social services, and administrative management. F 689	<p>Continued From page 3</p> <p>Practical Nurse (LPN) #2 on 11/13/20 at approximately 8:50 a.m. LPN #2 stated she was the nurse assigned to Resident #4 on 8/12/20 and she had worked with resident many years. LPN #2 stated the resident was confused related to progressive dementia, exhibited impulsiveness and thought herself to be more independent than she was as evidenced by attempting to walk without the walker and not asking for assistance. LPN #2 also stated the resident had a very unsteady gait and sometimes stated when she wanted to toilet that she was going home. LPN #2 further stated she didn't document certain required information on the report but she believes the resident was fully dressed and her brown moccasins were still on her feet. The room was bright, nothing was on the floor, the tray wasn't present and she had no recall of the walker. LPN #2 stated no one addressed details surrounding the fall with her after the report was completed therefore she didn't realize how important it was to fully describe the fall scene so the information could aid in developing interventions for fall prevention. LPN #2 stated the intervention she felt most appropriate for the resident upon return to the facility was to bring the resident out of her room to the dining area during awake hours so more staff could assist in monitoring her.</p> <p>Fall Risk Assessments were completed after each fall and each assessment indicated the risk for falls had increased. On 8/15/20 the score was 16, 9/20/20 the score was 19 and 9/22/20 the score was 25.</p> <p>Review of Resident #4's care plan revealed upon readmission to the facility on 8/15/20, she had a right hip fracture and the surgical site was held</p>	F 689	<p>on fall prevention and purposeful rounding for more supervision began on 12/10/20 and will continue to nurses, supervisors, managers, and all departments on all shifts by learning & development, nursing leadership and administration. Education by the interim Director of Nurses to the unit managers will be conducted on care plan interventions and updating Kardex & task assignments.</p> <p>C2. The elopement binders were updated on each unit and reception area on 11/11/20. Education was provided on 11/12/20 to nursing staff in regards to screening of high risk residents for elopement. Education on Code Green (Elopement) policy began on 11/30/20 with reception staff, nursing leadership, and staff and is ongoing across all shifts and departments by administrator and learning & development. Learning & Development will review Code Green with each new employee upon hire. Elopement binders are updated with any changes to resident elopement status.</p> <p>D1. Supervisors and Managers will conduct observational audits for supervision and to ensure that care plan interventions are being carried out across all shifts for three residents per day for 12 weeks. If variances are identified, involved staff will be immediately re-educated and corrections/action taken appropriate to the situation. We will record our findings for 12 weeks and corrections will be made as appropriate. Summary of audit findings</p>

F 689	<p>Continued From page 5</p> <p>was wearing a gown and socks, and was stating "get me up". LPN #1 further stated the resident bed was wasn't all the way to the floor and she didn't recall if side rails were present. LP #1 stated she didn't add all the above information to the report because she didn't realize it was important to describe the fall scene and she didn't recall anyone requesting additional information about the fall scene.</p> <p>An interview was conducted with CNA #2 on 11/13/20, at approximately 10:00 a.m., about Resident #4's 9/20/20 fall. CNA #2 stated she was assigned to provide care for Resident #4 on 9/20/20. CNA #2 stated they were told if the resident wasn't awake on rounds don't awake her therefore she didn't get the resident out of bed during rounds between 7:00 a.m. and 7:30 a.m. CNA #2 also stated if Resident #4 was awake they should toilet her, provide a.m. care. CNA #2 further stated she provided frequent rounds on the resident because the resident thinks she can walk independently and constantly tries to get up unassisted. CNA #2 stated since the right arm fracture the resident goes to the dining room after a.m. care until after lunch, then she goes to bed for an afternoon nap. CNA #2 also stated Resident #4 was on every thirty minute checks for a while after the two fractures.</p> <p>Review of Resident #4's care plan dated 9/29/20 revealed the following problem; At risk for injury from falls related to impaired cognition with poor safety awareness, use of psychotropic medications, arthritis and a history of falls. Resident refuses to allow staff to place gait belt when assisting her with ambulation. (name of resident) has a shuffling gait and tends to walk with her head looking downwards. F 689	<p>Continued From page 10</p> <p>attempts to exit the facility unattended her roles would be to telephone nursing for assistance and attempt to get the resident to stay inside until the nursing staff arrives. The full time day shift front desk receptionist stated there had always been an elopement book at the front desk containing approximately 23-30 resident names and photographs and it is each receptionist duty to review the book daily and sign off that you have viewed the book and nursing staff are responsible for keeping the book updated.</p> <p>An interview was conducted on 11/13/20 at approximately 11:00 a.m., with the front desk receptionist who was on duty when Resident #5 exited the door. The front desk receptionist stated he was fairly new to the long term care facility and he wasn't aware at the time the individual (Resident #5) who left the building was a resident and that known residents are not allowed to leave the building unescorted. The front desk receptionist stated he had training to the duties but he wasn't aware of an elopement book at the front desk, that residents were not allowed to exit the door unescorted and he didn't know until later the person he saw exit the door was Resident #5 and Resident #5 wasn't within his line of sight after she exited the door on 9/20/20. The front desk receptionist stated he made a mistake and accepted full responsibility for the the resident leaving the facility unescorted and since the education was provided he now knows the difference in his usual work environment and the long term care work environment.</p> <p>The facility's investigation established that Resident #5's unescorted exit from the facility was simply a stroll outside to sit on a bench, while</p>	F 689

F 689	<p>Continued From page 11</p> <p>the resident waited to visit with her daughter-in-law, which was observed by the front desk receptionist.</p> <p>A consultant's analysis dated 10/26/20, included Resident #5's exit from the building unescorted. The event was categorized as an elopement and/or unsupervised wandering and a note in the comments section stated "lets discuss what, why, resident outcome and action taken. The analysis also stated "the interim security guard let resident go outside" and the document stated the event was reported since the resident was on camera the entire time and the security guard was no longer employed.</p> <p>A nurse's note was observed in Resident #5's clinical record dated 11/11/20 which stated a call had been placed to the resident's son to discuss the potential of moving the bird cage to the unit the resident resides on because the birds bring great comfort to the resident. The note further stated moving the bird cage to a low traffic area would increase the ability to monitor the whereabouts of the resident by the staff. The nurse's note stated the son was in full agreement with the potential of increased monitoring of the resident combined with one of her treasured activities.</p> <p>On 11/13/20 at approximately 5:15 p.m., the evening shift front desk receptionist repetitively stated the Administrator the surveyors were attempting to make contact with wasn't listed on the extension list therefore calls were forwarded to the previous Administrator's voice mail. At that point an interview was conducted with the receptionist regarding allowing individuals to enter and leave the facility and if the elopement book</p>	F 689

F 689	Continued From page 12 review was something she was familiar with. The evening shift front desk receptionist wasn't a regular employee of the long term care facility and the interview revealed she wasn't knowledgeable of identifying persons leaving the facility or how to determine if the person was a resident or what to do if a resident attempted to exit the front door. The above information was shared with the Administrator, the Assistant Administrator, the Director of Nursing and the Unit Manager on 11/13/20 at 5:00 p.m. The Assistant Administrator stated the resident sat on the bench in front of the building the entire time she was outside and remained within sight of the front desk receptionist. The Administrator provided a document which stated upon beginning the assignment at the facility 11/5/20, a review of the 9/20/20 event for (name of the resident) aided them to reconsider their protocol. It was determined that re-education on the elopement protocols with receptionist and security teams would be beneficial in addition to reconstruction of the elopement book and review of procedures was immediately performed. An additional measure was to trial moving the bird aviary on to the residential unit to engage Resident #5 in self-determined activities.	F 689

F 880	<p>Continued From page 15</p> <p>Resident #1 was originally admitted to the facility on 11/06/20 from the community. Resident #1's diagnoses included Unspecified Dementia without Behavior Disturbances and Chronic Kidney Disease.</p> <p>The Admission Assessment Minimum Data Set (MDS) with an assessment reference date (ARD) of 11/13/20, coded the resident as completing the Brief Interview for Mental Status (BIMS) and scoring a 99. This coded Resident #1 as having short-term and long-term memory problems.</p> <p>In section "G" (Physical functioning) the resident was coded as needing extensive assistance with bed mobility, transfers, locomotion on the unit, dressing, eating, toileting and personal hygiene. Bathing required one person physical assistance.</p> <p>On 11/09/20 at approximately 1:20 p.m., an observation was made during the initial tour on the Garden Hill Unit (Observation Wing). Resident #1 was observed being transported by CNA (certified nursing assistant) #6 via wheelchair in the hallway near the nurse's station heading to the shower room. Resident #1 was not wearing a mask/facial covering. The door to the shower room remained opened as CNA #6 entered inside with Resident #1. The Unit Manager, (Registered Nurse-RN #1) standing nearby was asked what should have been done concerning the above issue. She stated, "Outside of rooms, residents should wear mask." In the meantime CNA #6 exited the shower room, proceeded down the hallway, entered a room, returned and approached the unit manager (who was now standing at the entrance of the shower room with the surveyor), saying "I can't find it." The nurse manager was observed removing an</p>	F 880	<p>C. Education began on 11/10/2020 to staff on proper PPE for residents out of the room. The inventory and distribution process for resident face coverings was reviewed with each unit on 11/18/2020. Par level and location of face coverings was established. Environmental Services replenishes face coverings daily on each neighborhood.</p> <p>D. Nursing Leadership and Administration will conduct observation rounds to communicate, audit, and reinforce compliance with appropriate resident PPE while out of the room. During the observation we will observe the daily replenishment of face coverings and appropriate resident PPE while out of the room. We will audit all shifts daily (five times per week) for 4 weeks and then all units daily (five times per week) for 8 weeks. Summary of audit findings will be submitted to monthly QAPI Committee for review and recommendations.</p> <p>E. Date of completion <input type="checkbox"/> 12/26/20</p>
