E 000	Initial Comments An unannounced Emergency Preparedness survey was conducted 3/15/2022 through 3/17/2022. The facility's Emergency Preparedness Plan was reviewed and found to be in compliance with CFR 483.73, the Federal requirements for Emergency Preparedness in Long Term Care facilities.	E 000			
F 000	INITIAL COMMENTS An unannounced Medicare/Medicaid standard survey was conducted 03/15/22 through 03/17/22. Two complaints were investigated during the survey. VA00054291 was unsubstantiated with no deficient practice. VA00054368 was substantiated with deficient practice. Corrections are required for compliance with 42 CFR Part 483 Federal Long Term Care requirements. The Life Safety Code survey/report will follow.	F 000

F 584	<p>Continued From page 2</p> <p>The findings include:</p> <p>1. Resident #3 was admitted to the facility with diagnoses that included atherosclerotic heart disease, COPD (chronic obstructive pulmonary disease), hypertension, gastroesophageal reflux disease, major depressive disorder, dementia, congestive heart failure and protein-calorie malnutrition. The minimum data set (MDS) dated 12/15/21 assessed Resident #3 with severely impaired cognitive skills.</p> <p>On 3/16/22 at 9:34 a.m., Resident #3 was observed seated in a "scoot" type wheelchair near the nursing desk. The upper right side of the chair back was torn with foam visible. The left arm cushion was deteriorated. Crumbs, drips and lint were accumulated on the support bars under the seat. The rear of the seat cushion was covered with crumbs and debris.</p> <p>On 3/16/22 at 1:45 p.m., registered nurse (RN) #2 was interviewed about the condition of Resident #3's wheelchair. RN #2 stated the wheelchair seat cushion had a hole where the resident moved back and forth in the seat. RN #2 stated the wheelchairs were supposed to be cleaned on a regular basis.</p> <p>On 3/16/22 at 3:46 p.m., the director of nursing (DON) was interviewed about Resident #3's wheelchair. The DON stated she looked at the chair today and the armrest was worn with metal exposed. The DON stated the seat covering was also cracked from use. The DON stated she removed the chair from use due to safety concerns regarding the exposed metal on the armrest.</p>	F 584	<p>was immediately initiated. The Maintenance Director determined that the damage occurred due to the resident's wheelchair occasionally scraping the wall. To prevent further damage, the director placed plastic/plexiglass type material around the walls.</p> <p>2. All residents have the potential to be affected by the deficient practice. Upon notice of the wheelchair concern we completed a 100% wheelchair audit to identify all wheelchairs in the facility that required cleaning and/or needed repair. This audit was conducted by the Rehab Director and Nursing staff. All wheelchairs requiring immediate attention were repaired and/or removed out of service until the repairs are addressed.</p> <p>All of the residents' rooms and bathrooms were immediately checked for damaged walls. There were no identified damaged walls.</p> <p>3. An audit will be conducted on every wheelchair weekly x 4 weeks, then monthly and as needed.</p> <p>Room rounds will be conducted by Admin staff to identify environmental concerns (including wall damage) 5 days/week; reported in Morning Meeting. Maintenance will be assigned repairs. Follow up will occur in Stand Down Meetings 5 days/week on an ongoing basis.</p> <p>4. The results of the audits will be</p>

F 584	<p>Continued From page 3</p> <p>This finding was reviewed with the administrator and director of nursing during a meeting on 3/16/22 at 4:30 p.m.</p> <p>2. On 03/15/2022 at 7:45 a.m., during the initial tour the drywall in the bathroom located in room 113 was observed in disrepair. The wall in the bathroom located near the baseboard had a section of drywall that was pushed in and had an uneven surface.</p> <p>On 03/16/2022 at 10:36 a.m., accompanied with the maintenance director (OS #2) in room 113, OS #2 was interviewed regarding the bathroom wall being in disrepair. OS #2 stated a couple of weeks earlier he had been made aware of a small area that needed repair in the bathroom; however the area was now larger. OS #2 stated, "I think the roommate was ramming his wheelchair against the wall. He tends to do that a lot and that is why I have put the plastic/plexiglass material around the walls of the room. So I guess I will need to do the same for the bathroom." OS #2 was asked if there was a maintenance request system. OS #2 stated, "We have a maintenance binder that I review 3 days per week. We also get information from the morning meetings. I don't think there was a maintenance request in the binder. I think I was told about the small area needing repair during the morning meeting."</p> <p>The above findings were reviewed with the administrator, director of nursing (DON), and corporate staff during a meeting on 03/16/2022 at 4:30 p.m.</p> <p>No additional information was provided to the survey team prior to exit on 03/17/2022 at 12:30 p.m.</p>	F 584	<p>reported after each audit to the Maintenance Director and Executive Director. The audits will be reported in the monthly QAPI meetings.</p> <p>5. March 31, 2022</p>

F 658	<p>Continued From page 21</p> <p>Resident #40 did not receive Flomax on the three days that she worked (March 7th, 8th or 9th).</p> <p>On 03/16/22 at approximately 10:00 AM, the consultant pharmacist was interviewed regarding Resident #40's Flomax order. The pharmacist stated that medications are automatically discontinued when a resident goes to the hospital and could not explain why Resident #40 still had a current order showing in the clinical record. The pharmacist stated that the facility may have had some medication (Flomax) left or a slight overage from ordering early, but stated that there is no way the facility had enough medication to get them all the way through March 15th. The pharmacist stated that there are two Flomax 0.4 mg pills in the stat box, but that is all.</p> <p>On 03/16/22 at approximately 3:30 PM, LPN #1 was interviewed again regarding Resident #40's Flomax. LPN #1 was made aware of the discrepancy between when the pharmacy last delivered a 30 day supply of the medication on 12/30/22, that it was being documented that Resident #40 was getting the medication, when the resident's 30 day supply should have been exhausted. LPN #1 had documented multiple times that the medication was given and was asked how a medication can be administered when the medication is not available to give. LPN #1 stated, "I would have borrowed it, I know that's illegal, but if I signed I gave it, I gave it." LPN #1 was asked how many days she borrowed medication. LPN #1 could not provide an answer. LPN #1 stated that she did not take the time to call the pharmacy or pull a sticker to reorder the medication for Resident #40.</p> <p>On 03/16/22 at approximately 4:00 PM, the</p>	F 658

F 658	Continued From page 22 administrator and DON were made aware of the above information in a meeting with the survey team. The DON stated that staff are not supposed to borrow medications from other residents. A policy was requested on administering medications per physician's orders and borrowing medications from other residents. A policy titled, "Administering Medications" was presented and reviewed. The policy documented, "...Medications are administered in accordance with the prescriber orders...medications ordered for a particular resident may not be administered to another resident..." No further information and/or documentation was presented prior to the exit conference on 03/17/22.	F 658			
F 684 SS=E	Quality of Care CFR(s): 483.25 § 483.25 Quality of care Quality of care is a fundamental principle that applies to all treatment and care provided to facility residents. Based on the comprehensive assessment of a resident, the facility must ensure that residents receive treatment and care in accordance with professional standards of practice, the comprehensive person-centered care plan, and the residents' choices. This REQUIREMENT is not met as evidenced by: Based on observation, staff interview, and clinical record review, the facility staff failed to follow physician's orders for two of 18 residents in the survey sample, Resident #40 and Resident #212. Resident #40 was not administered medication	F 684	1. Flomax was ordered during the survey and Resident #40 is receiving medication as ordered. Resident # 212 was discharged prior to survey on November 17, 2021.	4/14/22

F 759	<p>Continued From page 33</p> <p>staff interview, and clinical record review, the facility staff failed to ensure a medication error rate of less than 5 percent. The total number of opportunities were 35, with a total of 4 medication errors, which resulted in a medication error rate of 11.43 percent.</p> <p>Findings include:</p> <p>1. On 03/15/22 at 8:56 AM, LPN (Licensed Practical Nurse) #1 prepared medications for Resident #40. LPN #1 pulled the resident's medications and put them into a plastic medication cup. The medications were documented and then counted for accuracy. The count did not match. The medications in the cup were 12 pills; the number of pills documented was 10. LPN #1 was asked to pull each medication pill card/bottle from the medication cart. The pill cards/bottles were compared to the pills in the cup, as well as, what was documented. Each pill card had the pill's identifying characteristics listed. LPN #1 stated that she had pulled two of the famotidine pills (20 mg each) and stated the resident is ordered 40 mg. This made the count 11. LPN #1 stated that she also pulled a folic acid pill, which would then make the count 12. As a result of the above information, each medication in the cup was verified with the pill identifying characteristics listed on the medication card or bottle. All were correct except one white pill. LPN #1 stated that the last pill in the cup was the Norvasc 5 mg tablet. The pill in the cup did not match the pill in the Norvasc 5 mg card and did not match the identifying characteristics listed on the card for Norvasc 5 mg. LPN #1 then stated that she did not know, but felt certain the pill should be the Norvasc 5 mg tablet. The pill in the cup was again</p>	F 759	<p>medications as ordered at the dosage ordered.</p> <p>2. All residents have the potential to be affected. All Nurses have the potential to be affected.</p> <p>3. Nurses are educated on the 5 Rights of medications, removing discontinued meds from the cart, procedure for reordering medications, physician notification when medications are not available.</p> <p>Med pass observation with competency checklist will be conducted on the current Nurses and newly hired Nurses. Review orders to verify delivery of medications during Clinical Morning Meetings on an ongoing basis.</p> <p>Randomly audit 10% of residents weekly x4 weeks to verify meds available on the cart as ordered by the Physician. Appropriate follow up when not and notify the MD weekly x4 weeks then every 2 weeks x2 months to verify delivery availability of meds.</p> <p>Random observation of med pass to verify correct med was given at the correct dose and follow up when med is not available/documented. Weekly x4 weeks, then monthly.</p> <p>4. Report findings to QAPI monthly x3 months or until resolved.</p>

F 759	<p>Continued From page 34</p> <p>compared to the pill in the Norvasc 5 mg card. LPN #1 then stated, "That isn't the same pill." The pill in the cup was white, scored on one side, and had the imprint "PLIVA 434." This pill was identified as a Trazadone 100 mg tablet. LPN #1 had pulled the incorrect medication for administration. The Norvasc 5 mg pill that was ordered to be given at this time was not put in the cup for administration. LPN #1 was asked what she thought may have happened. LPN #1 stated that the Trazadone is a night time medication and she didn't pull any of those cards out. LPN #1 then stated that when she pulled the Norvasc 5 mg card out of the drawer, the first one was empty and the one behind it must have been the Trazadone card. LPN #1 stated, "I must not have paid attention to that." LPN #1 had another card of the Norvasc 5 mg tablets, but no pills had been removed from the card, it was full. LPN #1 stated that Resident #40 was also supposed to get a tamsulosin (Flomax) 0.4 mg capsule, but that the medication was not available, and she would have to call the pharmacy and have it delivered and would administer it when it arrived.</p> <p>LPN #1 stated, "...That's a med error." LPN #1 was made aware that the omission of the Norvasc 5 mg tablet and the addition of the Trazadone 100 mg tablet would count as two medication errors.</p> <p>A medication reconciliation was completed for Resident #40. The current physician's orders were: "...Tamsulosin HCL capsule 0.4 mg give 1 capsule by mouth one time a day for enlarged prostate (9:00 AM)...amlodipine (Norvasc) tablet 5 mg give one tablet by mouth one time a day (9:00 AM)...Trazadone 100 mg give one tablet by mouth one time a day (9:00 PM)..."</p>	F 759

F 759	Continued From page 36 On 3/15/22 at 10:00 a.m., LPN #4 was interviewed about the losartan potassium 25 mg administered to Resident #32. LPN #4 reviewed the current physician orders and stated the order was for a 50 mg dose. LPN #4 pulled the pharmacy supply card of losartan potassium used during the medication pass. The pharmacy label indicated the losartan potassium was 25 mg. LPN #4 looked through the medication cart and stated she did not see a supply card for a 50 mg dose. On 3/15/22 at 3:45 p.m., the unit manager (LPN #5) was interviewed about the medication error observed with Resident #32. LPN #5 looked through the medication cart and located a supply card with losartan potassium 50 mg tablets. LPN #5 stated the 50 mg dose was available and should have been given as ordered. The policy titled, "...general dose preparation of medication administration" documented, "...Verify each time a medication is administered that it is the correct medication, at the correct dose, at the correct route, at the correct rate, at the correct time for the correct resident..." This finding was reviewed with the administrator and director of nursing during a meeting on 3/15/22 at 4:30 p.m.	F 759

MD gave verbal phone order for UA C&S (Urinalysis Culture and Sensitivity). Clean urinal given to res with instructions for a clean catch urine sample."</p> <p>3/10/2022 - 6:32 a.m. - Nursing Progress Note - "Clean catch urine specimen obtained for C&S per MD orders."</p> <p>3/14/2022 - 1:15 p.m. - Nursing Progress Note - "Received call this shift from Lab. Res had urine sent to lab for UA C&S. According to the lab, the date on the urine was 3/10/22. Lab unable to process sample due to collection date being over 24 hours ago. Lab states urine needs to be recollected and a new order needed to be put in. SN put new order for UA C&S collection to be on third shift today, 3/14/22. MD office notified of change."</p> <p>At approximately 10:30 a.m. on 3/16/2022, the Director of Nursing (DON) was asked why the urine sample did not get to the lab on time. The DON stated that lab specimens are put out for lab pick-up and that the lab comes by around 6:00 a.m., and sometimes earlier, except for weekends.</p> <p>The following entry was also included in the Progress Notes:</p> <p>3/16/2022 - 2:49 p.m. - Nursing Progress Note - "Attempts made to collect urine for analysis this shift, resident continent and has gone to bathroom independently, resident has been asked to please ring call light when he feels urge to urinate, made him aware of need for</p>	F 770

F 770	Continued From page 44 specimen...." During an end of day meeting at 4:30 p.m. on 3/16/2022, that included the Administrator, DON, corporate nurse consultant, and the survey team, the collection of the urine sample from Resident # 40 was discussed. Asked if the sample obtained that day, 3/16/2022, was the sample ordered on 3/14/2022. the DON said, "Yes, I personally saw the sample." The DON went on to say, "We have three days to obtain the sample." There was no further discussion regarding the urine sample.	F 770
